## Knowledge Organiser: Year 9 Autumn Term 2

*'Knowledge is power' by Francis Bacon*

A knowledge organiser provides you with all the most important knowledge you need for each unit of study this half term. Your aim is to transfer all of this information into your long-term memory so you can use it in your lessons and further expand your understanding of this work.

How to use your knowledge organiser (KO):

1. Ensure you have your KO and Homework Learning journal with you at all times in school and when you need to do your homework at home.
2. In lessons when you have covered information that appears on your KO, your teacher will ask you to put a tick next to that section. This means that is now added to what you must learn for homework.
3. Initially, follow your homework timetable to decide what to revise each evening.
4. There are 4 strategies that you can use to revise. They are progressively more challenging so always start with the first in the list.

### **a. Look Cover Write Check**

- i. Identify the subject and section of your KO that you want to revise. This should be one of the ticked sections.
- ii. LOOK carefully at the subject and section of your KO you want to revise and try to remember as much as you can. Remember this should be a ticked section.
- iii. Now COVER this information so you can't read it.
- iv. WRITE out what you can remember word for word in your Homework Learning Journal.
- v. CHECK what you have written by comparing it to your KO. Tick each correct word in green pen and correct any errors you have made.
- vi. Repeat this process until you are confident you can remember everything you need.

**AIM:**

**You should be able to repeat the information by rote**

### **b. Self or peer quizzing**

- i. Identify the subject and section of your KO that you want to revise. This should be one of the ticked sections.
- ii. Write out a list of questions you could ask either yourself or a friend about this section of the KO. Write these in your Homework Learning Journal.
- iii. If you are working on your own, cover the KO and write a full answer to each question.
- iv. If you are working with a partner swap books and copy down their questions and have a go at answering them.
- v. Now uncover the KO and with a green pen correct your work.

**AIM:**

**You should be able to repeat the information by rote but with a good understanding**

### **c. Playing with words and sentences**

- i. Identify the subject and section of your KO that you want to revise. This should be one of the ticked sections.

- ii. You now want to check how well you have learnt the information in your KO.
- iii. Definitions – look at words that are used in this section. Can you write a definition in your own words?
- iv. Rephrasing – can you rewrite the sentences or explanations in your own words?
- v. Summary – can you summarise the main points of this section of the KO?
- vi. Synonyms – can you write synonyms for key words and ideas?
- vii. New Sentences – can you write a sentence that includes the key vocabulary or definitions that you have learnt?

**AIM**

**You should be able to use the information in your KO in a flexible and confident way in your writing.**

**d. Think it, Link it**

- i. This is a technique to use towards the end of the half term when you are revising all of the KO.
- ii. Think of the links or connections between different sections of your KO.
- iii. Write these out in your own words in your Homework Learning Journal.
- iv. Think about the links between a particular section of your KO and what you have learnt in your lessons. Can you expand on this section by linking it to your wider knowledge?
- v. Write this out in your Homework Learning Journal.

**AIM**

**You should be able to link your homework and your lessons to show a confident understanding of the work covered.**

**Homework Learning Journal**

- 1. Always write the subject and the date when you start your homework.
- 2. Always write the strategy that you are going to use for your homework.
- 3. Always use a ruler to underline titles and dates.
- 4. Use a blue or black pen to complete your homework or a pencil if you need to draw.
- 5. Use a green pen to complete corrections of your work.
- 6. **You are expected to complete half a side of your Homework Learning Journal each evening as a minimum.**

**Checking:**

Your tutor will check your Homework Learning Journal at least once a week. If they are concerned that you aren't doing your homework properly they will offer support and guidance. If you don't respond to this guidance you will be added to the afterschool 'Success club' where a member of staff will help you complete your homework.

**DO NOW tasks:**

At the start of every lesson you should expect a Do Now task. This is a low stakes retrieval quiz on what you have learnt so far. If you have completed your homework this should be easy. The aim is to get 100% in each of these. If you miss this target occasionally, don't worry. If it happens regularly your teacher will ask your tutor to have a chat and offer you support.

## Maths:

Your teacher will set you tasks to complete on Dr Frost Maths. This will be set every week on a Monday and will be collected in and checked on a Friday. If this has not been completed you will be issued a Detention on a Wednesday Lunchtime.

# How long should I spend on my homework?

| Key Stage 4 |                    |                    |                   |                    |                    |

| 55          | Reading / Revision | Reading / Revision |                   | Reading / Revision | Reading / Revision |

- You should spend about 35 minutes revising your KO each day.
- You should spend 25 minutes either reading or revising each day.
- This timetable is a guide. If you want to spend longer revising one subject that you find more difficult and less time on one you find easy, that is your choice.
- We would like you to spend one evening involved in a physical activity. This might be a sports club, a run, a game of football with friends or just a nice walk with the dog. Ask your PE teacher if you need guidance with this. It doesn't have to be on a Wednesday.

- ☐ Masks are used for different reasons and can be divided into masks that are used for **ritual reasons**, for **protection**, **disguise** and **entertainment**.

- ☐ Mod roc is another name for plaster impregnated gauze strips, and it can be used to make sculpture.

### Annotating your work

Use these heading to explain each piece of work you have done in your book

Tick

|          |   |  |
|----------|---|--|
| What?    | <b>What is it?</b> Explain the piece of work you are annotating Examples: This is a first-hand drawing that I made of a ...This is a series of photographs I took of... This is a collection of visual research about... This is information I gathered about... This is a copy that I made of a piece of artwork by... This is a mood board of...to show ideas relating... |  |
| Why?     | <b>Why did you make it?</b> Explain how this piece helped you in your project. Examples: to get ideas about... to get me thinking about... to show what I have learned about... to explore the ideas of... to examine the shape/form/line/texture/pattern of... to analyse the style of... to try out the technique of... to practice... to develop my skills in...         |  |
| How?     | <b>How did you make it?</b> Explain how you created the piece of work Examples: I drew it using... I painted it with... I constructed it from... I built it up by collaging... I photographed/drew it from life... I drew/painted it from a photography... I gathered the images from the internet... I researched the information on a site called...                      |  |
| Quality  | <b>How good is it?</b> What are you pleased with? What could you improve? Examples: I am pleased with the way I... one good element of the work is... the best feature of this work is... a section of this work that is particularly successful is...I'm not happy with... one area I could improve is... the least successful part of the work is... I wish that I had... |  |
| Learning | <b>What did you learn?</b> What have you found out? What are the next steps? Examples: I improved my skills in... I got better at working in the style of... I have a better idea of... I have a clearer understanding of... I feel more confident about... Next I will try... To follow this up, I will... To build on this piece of work I hope to...                     |  |

### Painting your mask... Top tips

- ☐ When painting your masks whether it is the Mod Roc or Clay, it is always best to paint a base layer colour.
- ☐ Practice a range of techniques, **dry brushing**, **tissue and paint**, **foil and paint**, **sgraffito**, **stencilling** before applying them to your mask.

### Types of paint

#### ☐ Acrylic

Acrylic paints are extremely versatile, and ideal for fine brushwork, glazing, staining, water media techniques. This smooth paint has excellent pigment quality, colour strength, and durability.

#### ☐ Watercolour

The paint has colour pigment suspended in water until the water dries and stains the surface. The paint brushes with fluidity and transparency and is built up in layers from light to dark.

#### ☐ Gouache

Gouache is a water-soluble and opaque paint so the white of the paper surface does not show through.

### Painting techniques

- ☐ **Dry brush-** The dry brushing painting technique uses a thin layer of paint that's roughly brushed over a surface to give rough textured surface. Ensure you have applied a base layer as it may show through depending on the amount of paint added.
- ☐ **Tissue and paint-** Add tissue and smooth or scrunch, then paint on top.
- ☐ **Foil and paint-** Foil can add a metal type effect, you can paint over to create a tarnished appearance.
- ☐ **Sgraffito**, is the process of scratching through a surface to reveal the colours underneath.
- ☐ **Stencilling** a thin sheet of card, plastic, or metal with a pattern or letters cut out of it, used to produce the cut design on the surface below by the application of ink or paint through the holes

B1b- Cell division and cell transport

| Mitosis – cell division |   | ✓ |
|-------------------------|---|---|
| Stage                   | Description   |   |
| 1                       | Number of sub-cellular structures (organelles e.g. ribosomes and mitochondria) increases. The DNA replicates to form two copies of each chromosome. |   |
| 2                       | One set of chromosomes is pulled to each end of the cell. Nucleus divides.  |   |
| 3                       | Cytoplasm and cell membrane divide forming 2 identical daughter cells.  |   |

Large organisms = small surface area: volume ratio

Small organisms = large surface area: volume ratio

☐

| Adaptations to maximise diffusion |                                    | ✓ |
|-----------------------------------|------------------------------------|---|
| Thin walls                        | Creates a short diffusion distance |   |
| Good blood supply                 | Maintains concentration gradient   |   |
| Increased surface area            | Maximises rate of diffusion        |   |

| Transport across membranes |  |                                |   | ✓ |
|----------------------------|--|--------------------------------|---|---|
| Process                    | Definition   | Diagram (to be drawn in class) | Examples  |   |
| Diffusion                  | The passive movement of particles resulting in a net movement from an area of higher concentration to an area of lower concentration. Occurs in solutions and gases. |                                | Movement of oxygen and carbon dioxide in gas exchange (lungs and leaves)  |   |
| Osmosis                    | The diffusion of water from a dilute to concentrated solution, across a partially permeable membrane   |                                | Movement of water across cell membranes into and out of cells   |   |
| Active transport           | The movement of particles from a low concentration to a high concentration, using energy from respiration  |                                | <ul style="list-style-type: none"> <li>Absorption of mineral ions into plant root hairs</li> <li>Absorption of sugar molecules from the gut into the blood</li> </ul> |   |

| What are business aims and objectives? |   | <input checked="" type="checkbox"/> |
|--|---|-------------------------------------|
| Aim                                    | The general goal of a business                          |                                     |
| Objective                              | A specific target that is set for a business to achieve |                                     |

| Purpose of setting objectives   | <input checked="" type="checkbox"/> |
|---|-------------------------------------|
| 1. Helps with decision making   |                                     |
| 2. Potential investors understand the direction the business is heading in. |                                     |
| 3. Provides a target  |                                     |
| 4. Motivates all employees  |                                     |

| Use of objectives in judging success   | <input checked="" type="checkbox"/> |
|--|-------------------------------------|
| Once a business has set objectives, it can check back after a period to monitor if these have been achieved, this is a way of measuring success.   |                                     |
| e.g. A business can measure the number of employees to assess if it has met its objective of growth<br>OR<br>Track share price or dividends paid if their objective s shareholder value. |                                     |

| Role of objectives in running a business               | <input checked="" type="checkbox"/> |
|--|-------------------------------------|
| A business can have a variety of different objectives: |                                     |
| 1. Survival  |                                     |
| 2. Growth (domestic and international markets)         |                                     |
| 3. Increased market share                              |                                     |
| 4. Social and ethical                                  |                                     |
| 5. Customer satisfaction                               |                                     |
| 6. Increased shareholder value                         |                                     |
| 7. Maximise profit                                     |                                     |

| Changing Objectives                   |  | <input checked="" type="checkbox"/> |
|---------------------------------------|--|-------------------------------------|
| Factors affecting objective choice    | Changing over time                       |                                     |
| 1. Size of the business               | 1. Survival to growth                    |                                     |
| 2. Level of competition in the market | 2. Reflect new legislation               |                                     |
| 3. Type of business                   | 3. Changes in the economic environment   |                                     |
| 4. Stakeholder views                  | 4. Changes in environmental expectations |                                     |

| Definitions                 |   | <input checked="" type="checkbox"/> |
|-----------------------------|---|-------------------------------------|
| Private sector organisation | Organisations owned by individuals            |                                     |
| Public sector organisation  | Organisations owned and run by the government |                                     |

## GCSE BUSINESS

## Business in the real world

## Topic 3.1.4/5 Stakeholders and Location

| Main stakeholders of a business |  | ✓ |
|---------------------------------|--|---|
| 1. Employees                    |  |   |
| 2. The government               |  |   |
| 3. Suppliers                    |  |   |
| 4. Community                    |  |   |
| 5. Customers                    |  |   |
| 6. Shareholders                 |  |   |

| Definitions |   | ✓ |
|-------------|---|---|
| Key term    | Definition  |   |
| Stakeholder | Any individual or group of individuals who can be impacted by a businesses actions. |   |

| Objectives of stakeholders |  | ✓ |
|----------------------------|--|---|
| Stakeholder group          | Typical objectives   |   |
| Employees                  | 1. Secure jobs<br>2. High earnings                               |   |
| Owners/Shareholders        | 1. High dividend payments<br>2. Share prices                     |   |
| Local Community            | 1. Local job creations<br>2. Minimise local environmental impact |   |
| Government                 | 1. Tax paid,<br>2. Growth  |   |
| Suppliers                  | 1. Fast payment<br>2. Growth                                     |   |
| Customers                  | 1. Quality<br>2. Customer service                                |   |

| Impact of business activity on stakeholders |   | ✓ |
|---|---|---|
| Stakeholder                                 | Impact  |   |
| Employee                                    | Employment opportunities<br>Earnings                  |   |
| Local Community                             | Employment<br>Investment in facilities<br>Pollution   |   |
| Suppliers                                   | On time payments, Price negotiations & Abuse of power |   |
| Shareholders                                | Performance impacts share price and dividends         |   |
| Government                                  | Tax avoidance   |   |

| Location factors              |  | ✓ |
|-------------------------------|--|---|
| Factor                        | Explanation  |   |
| Proximity to market           | A business will want to know where their customers are located and that they can reach them easily.  |   |
| Availability of raw materials | Some businesses rely on raw materials, being close to these will reduce uncertainty and costs.   |   |
| Availability of labour        | Businesses may need to be located near highly skilled workers or highly populated areas for large numbers of employees.                      |   |
| Competition                   | Some businesses may want to be far from their competitors where as other may want to challenge their competitors by locating closer to them. |   |
| Costs                         | Location decision are often affected by costs and the amount of money the business can afford.   |   |

| Impact and influences stakeholders have on businesses  |   | ✓ |
|--|---|---|
| <b>1. Negotiation:</b><br>Employees can demand better pay.<br>Suppliers can negotiate better terms and conditions  | <b>2. Direct Action:</b><br>Customers can stop buying products if they are unhappy<br>Employees can strike        |   |
| <b>3. Refusal to cooperate:</b><br>Local councils can refuse to cooperate if they feel a business is unethical for example they can refuse planning permission | <b>4. Voting:</b><br>Owners such as shareholders can vote during AGM's to influence the objectives of a business. |   |

| Why is location important?  |  | ✓ |
|---|--|---|
| <b>Cost:</b> Rent varies according to location, London will have much higher rent costs than south wales.   |  |   |
| <b>Sales:</b> Location can impact whether or not a business will get enough sales   |  |   |
| <b>Image:</b> For some businesses, where they are located will have a big impact on their image for example a tourist shop in central London compared to on the outskirts of London |  |   |

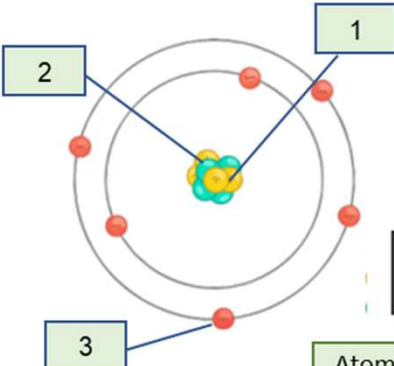

| Factors influencing the location decision of a business   |  | ✓ |
|---|--|---|
| Five key factors that influence a location decisions:   |  |   |
| 1. Proximity to the market<br>2. Availability of raw materials<br>3. Availability of labour<br>4. Competition<br>5. Costs |  |   |

| Nature of the business can influence location  |  | ✓ |
|--|--|---|
| <b>Retail:</b> Want to be located as close to customers as possible<br><b>Service:</b> Can be located anywhere as they may be able to offer their service remotely such as web designers. Taxi driver needs to be located close to customers<br><b>Manufacturing:</b> Cheap rent due to size of land required. Good infrastructure for transportation. |  |   |

## Chapter 1 – Atomic Structure and the Periodic Table

| Keyword         | Learn   | ✓ |
|-----------------|---|---|
| Atom            | The smallest part of an element that can exist.   |   |
| Element         | A substance made up of only one type of atom.   |   |
| Compound        | A substance made up of two or more types of atom, chemically combined in fixed proportions.             |   |
| Mixture         | A substance made up of two or more different elements or compounds, not chemically combined together.   |   |
| Filtration      | The process of separating insoluble solids from liquids using filter paper and a filter funnel.         |   |
| Evaporation     | The process of removing a solvent by heating so that it changes state into a gas.                       |   |
| Crystallisation | The process of obtaining crystals of a solid solute from a solution.                                    |   |
| Distillation    | A technique used to obtain pure solvent from a solution by evaporating and condensing the solvent.      |   |
| Chromatography  | A technique used to separate a mixture of soluble substances.   |   |
| Rf Value        | $R_f = \frac{\text{Distance moved by substance}}{\text{Distance moved by solvent}}$                     |   |
| Solute          | The substance that is dissolved in a solution   |   |
| Solvent         | A substance that dissolves a solute, making a solution.   |   |
| Solution        | A mixture formed by a solid or gas (solute) dissolving in a solvent.                                    |   |
| Saturated       | A solution in which no more solute can dissolve at that temperature.                                    |   |
| Isotope         | An atom of an element with the same number of protons (atomic number) but different number of neutrons. |   |

### Atomic Structure

|   | Particle | Relative Mass | Charge |
|---|----------|---------------|--------|
| 1 | proton   | 1             | +1     |
| 2 | neutron  | 1             | 0      |
| 3 | electron | Very small    | -1     |

atomic number

Mass number

Atomic number = number of protons

Mass number = number of protons + number of neutrons

6 12.011  
C  
carbon

### The Periodic Table

#### MODERN PERIODIC TABLE

- Elements ordered by atomic number
- Metals on left; non-metals on right
- Elements organized into groups (vertical columns) based on number of electrons in outer shell
- Elements organised into periods based on number of electron shells
- Group 1 = alkali metals
- Group 7 = halogens
- Group 0 = noble gases
- Centre block - transition metals

#### MENDELEEV'S PERIODIC TABLE (1869)

- Elements ordered by atomic mass
- Elements in groups with other elements having similar properties
- Left gaps to make elements fit the pattern.
- Predicted properties of missing elements, which were later discovered, matching his predictions

#### Key Equation

$$\text{relative atomic mass } (A_r) = \frac{\text{sum of (isotope abundance} \times \text{isotope mass number)}}{\text{sum of abundances of all isotopes}}$$

## Chapter 1b – Atomic Structure and the Periodic Table

| Keyword           | Learn  | ✓ |
|-------------------|--|---|
| Physical Property | A characteristic of a substance that can be observed or measured without changing the identity of the substance.<br>Examples are: melting and boiling point, density, hardness, colour, electrical conductivity. |   |
| Chemical Property | A characteristic of a substance that may be observed when it takes part in a chemical reaction.<br>Examples are: reactivity, flammability, toxicity.   |   |
| Metal             | Element that forms positive ions by losing one or more electrons to get a stable, full outer shell.  |   |
| Non-metal         | Element that forms negative ions by gaining one or more electrons to get a stable, full outer shell.   |   |
| Ion               | A charged particle formed when an atom gains or loses electrons to form a full outer shell. The number of protons is different to the number of electrons in an ion, which makes them charged.                   |   |

### Electron Configuration

You need to be able to draw the arrangement of electrons of the first 20 elements. Complete the examples below:

helium

carbon

chlorine

Answers:  
He = 2; C = 2,4;  
Cl = 2,8,7

Electrons are found in shells. A maximum of 2 in the innermost shell, which is filled first, then 8 in the second and third shells.

### Development of the Atomic Model

SOLID SPHERE MODEL

JOHN DALTON

Atom is a solid sphere.

PLUM PUDDING MODEL

J.J. THOMSON

Atom is a ball of positive charge with negatively charged electrons scattered throughout.

NUCLEAR MODEL

ERNEST RUTHERFORD

- Mass and positive charge concentrated in nucleus
- Electrons orbit nucleus
- Mostly empty space

PLANETARY MODEL

NIELS BOHR

Electrons orbit in shells at fixed distances from nucleus.

### Trends in the Periodic Table

#### GROUP 1 (Alkali Metals)

- Reactivity increases down the group
- Outer shell electrons are further from the nucleus as atomic radius increases
- Attraction between nucleus and outer shell electrons becomes weaker
- Outer shell electrons are more easily lost

#### GROUP 7 (Halogens)

- Reactivity decreases down the group
- Outer shell electrons are further from the nucleus as atomic radius increases
- Attraction between nucleus and outer shell electrons becomes weaker
- Outer shell electrons are less easily gained

#### GROUP 0 (Noble Gases)

- Unreactive due to full outer shell of electrons
- Boiling point increases down group because number of electrons increases, so attraction between atoms gets stronger

#### TRANSITION METALS

- Harder & denser than Group 1 metals, with higher melting & boiling points
- Less reactive than Group 1 metals

### Neutrons

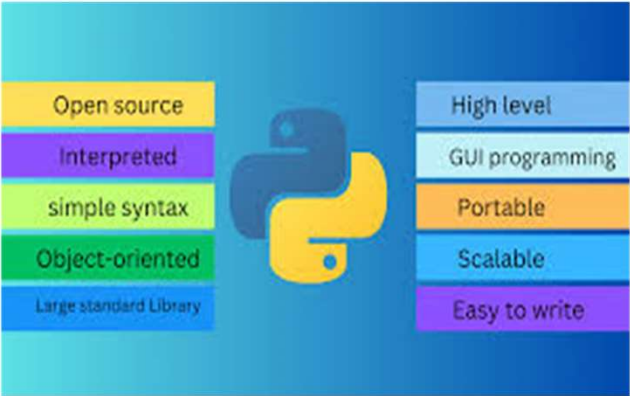

James Chadwick discovered the neutron.

This explained the existence of isotopes. Atoms of the same element could have the same number of protons (atomic number) but a different atomic mass due to a different number of neutrons.

## 2.2 Programming Fundamentals

| Keyword   | Definition / Example  | ✓ |
|-----------|---|---|
| Array     | A data structure that stores a collection of values with the same data type under one name/identifier. Each value is called an element and is accessed by an index position.  |   |
| 1D array  | A row of data values stored under one name.<br><br><pre>names = ["Bob", "Tom", "Fred"]<br/>print(names[2]) #Outputs Fred</pre>  |   |
| 2D array  | Represents a table structure with rows and columns.<br><br><div><div>Python</div><pre>class = [ ["Bob", "Tom", "Fred"],<br/>          ["Joe", "Shirley", "Steven"] ]<br/>print(class[1][0]) #Outputs Joe</pre></div> <div><div>OCR Ref.</div><pre>class = [ ["Bob", "Tom", "Fred"],<br/>          ["Joe", "Shirley", "Steven"] ]<br/>print(class[1,0]) #Outputs Joe</pre></div> |   |
| Iteration | Used to repeat sections of code a number of times.  |   |

| Keyword  | Definition / Example  | ✓             |  |  |  |  |
|--|---|---------------|--|--|--|--|
| Iteration – count controlled   | <p>FOR loops are used when we know the exact number of iterations we wish to make. They are count-controlled.</p> <table><tr><td><b>Python</b></td><td><b>OCR Ref.</b></td></tr><tr><td><pre>#Outputs 1-10 for count in range (1,11,1):     print(count)</pre></td><td><pre>//Outputs 1-10 for count = 1 to 10 step 1     print(count) next count</pre></td></tr></table>   | <b>Python</b> | <b>OCR Ref.</b>  | <pre>#Outputs 1-10 for count in range (1,11,1):     print(count)</pre> | <pre>//Outputs 1-10 for count = 1 to 10 step 1     print(count) next count</pre>           |  |
| <b>Python</b>  | <b>OCR Ref.</b>   |               |  |  |  |  |
| <pre>#Outputs 1-10 for count in range (1,11,1):     print(count)</pre>                     | <pre>//Outputs 1-10 for count = 1 to 10 step 1     print(count) next count</pre>  |               |  |  |  |  |
| Iteration – condition controlled   | <p>WHILE loops are used when the we do not know the exact number of iterations needed and this varies according to some condition. They are condition controlled.</p> <table><tr><td><b>Python</b></td></tr><tr><td><pre>continue = "Y" while continue == "Y":     continue = input("Continue?")</pre></td></tr><tr><td><b>OCR Ref.</b></td></tr><tr><td><pre>continue = "Y" while continue == "Y"     continue = input("Continue?") endwhile</pre></td></tr></table> | <b>Python</b> | <pre>continue = "Y" while continue == "Y":     continue = input("Continue?")</pre> | <b>OCR Ref.</b>  | <pre>continue = "Y" while continue == "Y"     continue = input("Continue?") endwhile</pre> |  |
| <b>Python</b>  |   |               |  |  |  |  |
| <pre>continue = "Y" while continue == "Y":     continue = input("Continue?")</pre>         |   |               |  |  |  |  |
| <b>OCR Ref.</b>  |   |               |  |  |  |  |
| <pre>continue = "Y" while continue == "Y"     continue = input("Continue?") endwhile</pre> |   |               |  |  |  |  |

| Poem                    | Themes   | ✓ | Content  | ✓ | First class quotations  | ✓ | Context   | ✓ |
|-------------------------|--|---|--|---|---|---|---|---|
| Poppies                 | Loss, family, suffering, motherhood                |   | Focuses on a mother's perspective of waiting for her son to come back from war and remembering his childhood.                        |   | "All my words flattened, rolled, turned into felt"<br>"Like a treasure chest"                               |   | Weir was a textile designer. Conflict is ambiguous to give a timeless relevance to families left behind.                    |   |
| Kamikaze                | Patriotism, honour, nature, memories               |   | Follows the journey of a pilot going into battle, his decision to return home, and how his family shun him afterwards.               |   | "Dark shoals of fish flashing silver"<br>"A shaven head full of powerful incantations"                      |   | Cowardice was a great shame in wartime Japan, it brought rejection from society.  |   |
| The Emigree             | Identity, memory, childhood, displacement          |   | A female is forced to leave her country for political or social reasons. Her positive memories of home cannot be lost.               |   | "I comb its hair and love its shining eyes"<br>"I am branded by an impression of sunlight"                  |   | Published in 1993, still topical. Country is not specified, gives the poem a timeless relevance.                            |   |
| Ozymandias              | Nature, decay, pride, leadership                   |   | The narrator meets a traveller who tells him about a decayed stature that he saw in a desert. Human power is temporary.              |   | "Look on my works, ye mighty, and despair"<br>"The lone and level sands stretch far away"                   |   | Romantic poetic, interested in nature and emotion. Inspired by the French revolution, opposed the oppressive monarchy.      |   |
| Prelude                 | Nature, fear, childhood, experiences               |   | A boy confidently steals a boat, rows across a lake, sees a looming mountain ahead and gets scared, scared by the experience.        |   | "An act of stealth/ and troubled pleasure"<br>"Upreared its head"   |   | Part of a 14 book epic poem. Orphaned at 13, lived with family in the Lake District who treated him badly, became suicidal. |   |
| Storm on the Island     | Nature, fear, politics, community                  |   | The community prepares for a violent storm and describe the various sounds and sights during it.                                     |   | "Exploding comfortably"<br>"Spits like a tame cat turned savage"  |   | Published during The Troubles in Northern Ireland. STORMONT is the name of the Northern Irish parliament.                   |   |
| London                  | Corruption, inequality, poverty, loss of innocence |   | Narrator describes a walk around London, he is saddened by the sights and sounds of poverty.   |   | "Mind-forged manacles"<br>"Every black'ning church appals"  |   | Blake had radical political views, he believed in social and racial equality. From a collection focusing on lost innocence. |   |
| My Last Duchess         | Pride, control, jealousy, status                   |   | Shows a visitor around his art collection and points out a portrait of his dead wife. He was annoyed by her "flirtatious" behaviour. |   | "As if she ranked / My gift of a nine-hundred-years old name"<br>"I gave commands; then all smiles stopped" |   | Based on the Duke of Ferrara (1533-1598) whose wife died suspiciously. He is the inspiration for Browning's poem.           |   |
| Checking Out Me History | Protest, identity, pride, culture                  |   | Represents the voice of a man who was frustrated by the Eurocentric history curriculum that he was taught at school.                 |   | "Dem tell me wha dem want"<br>"I carving out me identity"   |   | Born in British Guyana, moved to England when grown up. His poems challenge racism and prejudice.                           |   |
| Tissue                  | Nature, control, identity, fragility               |   | Explores the paradox that although paper is fragile, temporary and ultimately not important, we allow it to control our lives.       |   | "The sun shines through their borderlines"<br>"Let the daylight break through capitals and monoliths"       |   | Taken from a collection that questions how well we know the people around us ("The Terrorist At My Table")                  |   |

| Contained narrative plan               | ✓ |
|--|---|
| Establish a thread                     |   |
| Drop the reader into the setting       |   |
| Zoom in on a character                 |   |
| Shift to another time or place         |   |
| Return/ zoom in on the character again |   |
| Zoom out and close the narrative       |   |
| Motif will run throughout              |   |

| Opening hooks         | Effect   | ✓ |
|-----------------------|--|---|
| Action                | Throws the reader into chaos, could create disorientation.     |   |
| Question              | Involves the reader from the start.                            |   |
| Dialogue              | Gives insight into the character's issues.                     |   |
| Something unexpected  | Creates a puzzling effect, intrigues the reader.               |   |
| A contrast            | Forces the reader to consider deeper ideas.                    |   |
| Character description | Allows connection with key characters.                         |   |
| Setting description   | Orientates the reader to the surroundings, creates atmosphere. |   |
| Humour                | Immediately engages the reader.                                |   |

| Techniques          | Definition  | ✓ |
|---------------------|---|---|
| Motif               | A dominant of recurring idea in a piece of writing.   |   |
| Tense               | Expresses time of action (past, present, future)  |   |
| Fragmented sentence | A sentence missing either its subject or main verb.   |   |
| In media res        | Starting in the middle of the action.   |   |
| Symbolism           | Using words, images, people, locations or abstract ideas to represent something beyond the literal meaning. |   |
| Assonance           | Repetition of vowel sounds in words that are close together.  |   |
| Atmosphere          | The main tone/ mood of a piece of writing.  |   |

| Ending type              | Definition  | ✓ |
|--------------------------|---|---|
| Cyclical narrative       | Where the ending resumes back to the beginning.   |   |
| Plot twist               | Complete change in direction.   |   |
| Epiphany                 | Sudden moment of realisation for the character.   |   |
| Cliff hanger             | The reader is unclear at the end.   |   |
| Resolved                 | The strands of the plot are brought together and completed.   |   |
| Converging storylines    | Two or more different storylines converge at the end.   |   |
| Deus ex machina          | Where a seemingly unsolvable problem is suddenly solved by a new character/ place/ object/ unexpected occurrence. |   |
| Repeated motif or symbol | Ending with zooming back in on the motif that runs throughout.  |   |

| Glossary     |  |   |
|--------------|--|---|
| Key term     | Meaning  | ✓ |
| Convincing   | Believable as true.                              |   |
| Compelling   | Powerful/ interesting.                           |   |
| Cacophonic   | A harsh mixture of sounds.                       |   |
| Bobsled      | A mechanically steered sled.                     |   |
| Laceration   | Deep cut or tear in skin.                        |   |
| Foible       | A weakness/ eccentricity in someone's character. |   |
| Salvo        | A simultaneous release of weapons in battle.     |   |
| Interlude    | An interval.                                     |   |
| Contretemps  | Dispute/ disagreement.                           |   |
| Pneumatic    | Operated by air or gas under pressure.           |   |
| Aural        | Related to hearing.                              |   |
| Tympanic     | Related to the ear drum.                         |   |
| Endeavouring | Try hard to do something.                        |   |
| Terrestrial  | On or relating to Earth.                         |   |

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Year 9 Health and Safety and Hygiene

- Good food safety and hygiene practices are essential to reduce the risk of food poisoning.

## Food poisoning

Food poisoning can be caused by:

- bacteria, e.g. through cross-contamination from pests, unclean hands and dirty equipment, or bacteria already present in the food, such as salmonella;
- physical contaminants, e.g. hair, plasters, egg shells, packaging;
- chemicals, e.g. cleaning chemicals.

Bacterial contamination is the most common cause.

Microorganisms occur naturally in the environment, on cereals, vegetables, fruit, animals, people, water, soil and in the air. Most bacteria are harmless but a small number can cause illness.

Harmful bacteria are called pathogenic bacteria.

The process of food becoming unfit to eat through oxidation, contamination or growth of micro-organisms is known as food spoilage.

## Bacterial growth and multiplication

Most bacteria, including those that are harmful, have four requirements to survive and grow:

- food;
- moisture;
- warmth;
- Oxygen

## High risk food

Bacteria easily multiply on foods known as 'high-risk food'. These are often high in protein or fat, such as cooked meat and fish, dairy foods and eggs. Cooked pasta and rice are also regarded as high risk foods if they are not cooled quickly after cooking and stored below 5°C.

## Moisture

Bacteria need moisture to survive. Dried foods, such as powdered milk, cereals or dried egg do not support bacterial growth, if properly stored. However, if moisture is added, any bacteria still alive can quickly begin to multiply.

## Food poisoning Bacteria e.g.

Salmonella  
Listeria  
E-Coli  
Campylobacter  
Bacillus Cereus  
Staphylococcus aureus  
Clostridium perfringens  
These are all Pathogenic bacteria.

## People at risk

Elderly people, babies and anyone who is ill or pregnant needs to be extra careful about the food they eat.

## Why clean?

To remove grease, dirt and grime, and prevent food poisoning and pests. Dirty surfaces and equipment encourage flies etc

## Symptoms of food poisoning

The symptoms of food poisoning include:

- nausea;
- vomiting;
- stomach pains;
- diarrhoea.

## Temperatures to remember

To reduce the risk of food poisoning, good temperature control is vital:

- 5-63°C – the danger zone where bacteria grow most readily.
- 37°C – body temperature, optimum temperature for bacterial growth.
- 0-5°C – operating range of your fridge
- 75°C – if cooking food, the core temperature, middle or thickest part should reach at least this temperature.
- 75°C – if reheating food, it should reach at least this temperature. Remember to reheat food only once!
- 18 Degrees C correct temperature for a freezer.

## Allergen and food intolerance awareness

There are 14 ingredients (allergens) that are the main reason for adverse reactions to food. Cross-contamination of food containing these allergens must be prevented to reduce the risk of harm. They must also be labelled on pre-packaged food and menus so that consumers can make safe choices. The 14

- |                           |                 |
|---------------------------|-----------------|
| Celery (and celeriac)     | Milk            |
| Cereals containing gluten | Molluscs        |
| Crustaceans               | Mustard         |
| Eggs                      | Nuts            |
| Fish                      | Peanuts         |
| Lupin                     | Sesame          |
|                           | Soybeans        |
|                           | Sulphur dioxide |

## Where should food be stored in the fridge?

### Cheese, dairy and egg-based products

The temperature is usually coolest and most constant at the top of the fridge, allowing these foods to keep best here.

### Cooked meats

Cooked meats should always be stored above raw meats to prevent contamination from raw meat.

### Raw meats and fish

Raw meats and fish should be below cooked meats and sealed in containers to prevent contamination of salad and vegetables.

### Salad and vegetables

These should be stored in the drawer(s) at the bottom of the fridge. The lidded drawers hold more moisture, preventing the leaves from drying out.

## Getting ready to cook

- Remove blazers/jumpers and roll up long sleeves.
- Tie up long hair and tuck in ties or head coverings.
- Thoroughly wash and dry hands.
- Put on a clean apron.

## Best-before-date

You can eat food past this date but it might not be at its best quality.

## Time

When bacteria spend enough time on the right types of food, at warm temperatures, they multiply and cause illness. They multiply by Binary Fission. Reheat food only once and eat leftovers within 48 hours.

## Use-by-date

You've got until the end of this date to use or freeze the food before it becomes too risky to eat. These are usually high risk foods.

### USE BY:

25/08/20

KEEP REFRIGERATED

### BEST BEFORE:

25/08/21

STORE IN A COOL DRY PLACE

## Health and Safety- Before using electrical equipment- Ensure all plugs are secure and cables are intact. Food processors, blenders and deep fat fryers should be on a level surface, do not over fill them. Do not allow cables and leads to become a trip hazard.

Do not allow electrical components near to water, only wipe these parts down with a damp cloth. Be careful of sharp blades when cleaning them. When using hand held electric whisks ensure loose garments and hair are tied away.

## Key terms

**Allergens:** Substances that can cause an adverse reaction to food. Cross-contamination must be prevented to reduce the risk of harm.

**Bacteria:** Small living organisms that can reproduce to form colonies. Some bacteria can be harmful (pathogenic) and others are necessary for food production, e.g. to make cheese and yogurt.

**Cross-contamination:** The transfer of bacteria from one source to another. Usually raw food to ready-to-eat food but can also be the transfer of bacteria from unclean hands, equipment, cloths or pests. Can also relate to allergens.

**Food poisoning:** Illness resulting from eating food which contains food poisoning micro-organisms or toxins produced by micro-organisms.

**High risk ingredients:** Food which is ready to eat, e.g. cooked meat and fish, cooked eggs, dairy products, sandwiches and ready meals. These are usually moist high protein foods but can include those kept warm on hotplates like Gravies, soups and stews.

**Knife Safety-** Different knives are used to cut and chop all sorts of foods, it is imperative to use the right knife for the right job and to ensure the correct hold, either the bridge or the claw.

**Paring Knife-**Fruit and Vegetables

**Palette knife-** spreading mixtures

**Table knife-** spreading and mixing liquid into dry mixtures.

**Filleting knife** – flexible blade to cut flesh from fish bones.

**Chef's Knife-** cutting meat etc

**Serrated edge** carving knives-cutting bread etc

| avoir         | to have    |
|---------------|------------|
| J'ai          | I have     |
| Tu as         | You have   |
| Il/Elle a     | He/She has |
| Nous avons    | We have    |
| Vous avez     | You have   |
| Ils/Elles ont | They have  |

| être           | to be     |
|----------------|-----------|
| Je suis        | I am      |
| Tu es          | You are   |
| Il/Elle est    | He/She is |
| Nous sommes    | We are    |
| Vous êtes      | You are   |
| Ils/Elles sont | They are  |

| faire          | to do/make        |
|----------------|-------------------|
| Je fais        | I do/make         |
| Tu fais        | You do/make       |
| Il/Elle fait   | He/She does/makes |
| Nous faisons   | We do/make        |
| Vous faites    | You do/make       |
| Ils/Elles font | They do/make      |

| aller          | to go       |
|----------------|-------------|
| Je vais        | I go        |
| Tu vas         | You go      |
| Il/Elle va     | He/She goes |
| Nous allons    | We go       |
| Vous allez     | You (pl) go |
| Ils/Elles vont | They go     |

| Verb endings in the simple future |      | For example         |
|-----------------------------------|------|---------------------|
| Je                                | -ai  | Je mangerai         |
| Tu                                | -as  | Tu mangeras         |
| Il/Elle/On                        | -a   | Il/Elle/On mangera  |
| Nous                              | -ons | Nous mangerons      |
| Vous                              | -ez  | Vous mangerez       |
| Ils/Elles                         | -ont | Ils/Elles mangeront |

### The simple future:

It is used to describe what will happen in the future "I will eat".

To form it, use future stem plus appropriate ending e.g je mangerai – *I will eat*.

For –er and –ir verbs, the future stem is the infinitive.

For –re verbs, drop the –e from the infinitive. e.g. boire -> Je boirai – *I will drink*

| Mots essentiels       | Essential words |
|-----------------------|-----------------|
| alors                 | so/then         |
| au moins              | at least        |
| chaque                | each            |
| d'abord               | first           |
| de bonne heure        | early           |
| deux fois par semaine | twice a week    |
| donc                  | so              |
| ensuite               | then            |
| finalelement          | finally         |
| où                    | where           |
| à l'avenir            | in the future   |
| quand                 | when            |

| Picture description             |                           |
|---------------------------------|---------------------------|
| <i>Sur la photo</i>             | On the photo              |
| <i>Je peux voir</i>             | I can see                 |
| <i>On peut voir</i>             | We/you can see            |
| <i>Il y a</i>                   | There is/are              |
| <i>À gauche</i>                 | On the left               |
| <i>À droite</i>                 | On the right              |
| <i>Au centre</i>                | In the centre             |
| <i>À l'arrière plan</i>         | In the background         |
| <i>Au premier plan</i>          | In the foreground         |
| <i>Il est en train de ...</i>   | He is in the middle of    |
| <i>Ils sont en train de ...</i> | They are in the middle of |

### Simple future verb forms for irregular verbs

| Irregular future stems + same endings |      |
|---------------------------------------|------|
| avoir                                 | aur- |
| être                                  | ser- |
| aller                                 | ir-  |
| faire                                 | fer- |

### Les parties du corps Parts of the body

|                           |                  |  |
|---------------------------|------------------|--|
| <b>La bouche</b>          | mouth            |  |
| <b>Le bras</b>            | arm              |  |
| <b>Le corps</b>           | body             |  |
| <b>Le dos</b>             | back             |  |
| <b>L'épaule (f)</b>       | shoulder         |  |
| <b>Le front</b>           | forehead         |  |
| <b>Le genou</b>           | knee             |  |
| <b>La jambe</b>           | leg              |  |
| <b>La main</b>            | hand             |  |
| <b>Le nez</b>             | nose             |  |
| <b>Les oreilles (fpl)</b> | ears             |  |
| <b>Le pied</b>            | foot             |  |
| <b>La tête</b>            | head             |  |
| <b>Le visage</b>          | face             |  |
| <b>Les yeux (mpl)</b>     | eyes             |  |
| <b>J'ai mal à</b>         | I have a pain in |  |

### Manger sain Eating healthy

|                              |                |  |
|------------------------------|----------------|--|
| <b>les boissons gazeuses</b> | fizzy drinks   |  |
| <b>les céréales (fpl)</b>    | cereals        |  |
| <b>les chips (fpl)</b>       | crisps         |  |
| <b>l'eau (f)</b>             | water          |  |
| <b>les pommes de terre</b>   | potatoes       |  |

### Le sport et le fitness

|                                    |                        |  |
|------------------------------------|------------------------|--|
| <b>le sport diminue le stress</b>  | sport decreases stress |  |
| <b>C'est bon pour le moral</b>     | is good for morale     |  |
| <b>C'est important pour la vie</b> | is important in life   |  |
| <b>ça me fatigue</b>               | it makes me tired      |  |

### On joue au paintball

|                                    |                          |  |
|------------------------------------|--------------------------|--|
| <b>Qu'est-ce qui s'est passé?</b>  | What happened?           |  |
| <b>Tu es touché?</b>               | Have you been hit?       |  |
| <b>Où est-ce que tu es touché?</b> | Where have you been hit? |  |
| <b>le terrain</b>                  | grounds                  |  |
| <b>les billes (fpl)</b>            | paintballs               |  |
| <b>le casque</b>                   | helmet                   |  |
| <b>le matériel</b>                 | Materials/equipment      |  |
| <b>les règles</b>                  | rules                    |  |

Development Dynamics 2: India

|  |  |   |  |
|--|--|---|--|
| <div>1. How significant is India as a country? <input type="checkbox"/></div> <div><p><b>Site</b> – The actual location of a settlement on the Earth, composed of the physical characteristics of the landscape.</p><p><b>Situation</b> - The location of a place relative to its surroundings and other places.</p><ul style="list-style-type: none"><li>India is an example of an <b>emerging</b> country.</li><li>It has one of the <b>fastest growing economies 7%</b> and is predicted to have the <b>second largest economy by 2050</b>.</li><li>The <b>location</b> of India encourages its growth, it can easily trade with Europe and South East Asia.</li><li>India is the worlds most populated country <b>1.42 Billion</b>.</li><li><b>Politically</b> It is the worlds largest democracy.</li><li>It was once <b>colonised</b> by Britain.</li><li>There are <b>four</b> major religions with <b>Hinduism</b> being the largest.</li><li>India has the worlds largest film industry (<b>Bollywood</b>).</li><li>It has a wide range of <b>Biodiversity</b>.  Including Tigers and Elephants.</li></ul></div> | <div>3. How do TNC's operate in India? <input type="checkbox"/></div> <div><p>Many transnational corporations (TNCs) have set up factories and offices in India.</p><p>The country is an attractive location to TNCs because the population is well educated, and employees will work for lower wages than people in many other countries. Companies like Hyundai and Honda manufacture cars in India. Companies like Microsoft, Ford and Virgin Media have call centres in India.</p><p>Three types of outsourcing have occurred in India:</p><ul style="list-style-type: none"><li><b>Call centres</b>- Most Indian call centre employees are graduates earning £3000 a year (20% of what BT has to pay in the UK)</li><li><b>Software development</b>- Universities such as Bangalore provide technically qualified graduates who enable BT to develop and support its broadband.</li><li><b>Company administration</b>- e.g. accounting</li></ul></div> <div>4. What impacts have these changes had on the people and environment of India? <input type="checkbox"/></div> <div><p>Not only has the population structure changed since 1950, <b>WHERE</b> people are living in India has also changed over time. In 1960, 18% of India's population was urban. By 1990, this had risen to 26% and in 2022 to 36%.</p><p>The main cause of this is a result of <b>push</b> (rural poverty) and <b>pull</b> (increase in jobs) factors, leading to <b>rural-urban migration</b>, consequently increasing <b>urbanisation</b>.</p><p>As a result, economic growth within India is mainly urban, with wealth being concentrated within its cities. This leads to the positive multiplier effect.</p><p>Invest → Growth of industry → workforce increases → people move there → services open → demand for workers.</p><p>Environmental degradation has occurred in for main ways:</p><ul style="list-style-type: none"><li>Air pollution</li><li>Water pollution</li><li>Deforestation and desertification</li><li>Greenhouse gases and climate change</li></ul></div> | <div>4. What are the positives and negatives of Top Down development? <input type="checkbox"/></div> <div><p><b>Top-down</b> development involves: decision-makers – usually governments or <b>Transnational Companies (TNCs)</b> experts who plan changes.</p><p>Top-down development schemes: are large and expensive often involve loans from <b>Inter-Governmental Organisation (IGOs)</b> – i.e. government banks.</p><p>The <b>Sardar Sarovar Dam</b> was funded by the World Bank, Japanese banks and the Indian government.</p><p><b>The winners are:</b></p><ul style="list-style-type: none"><li>India's cities – hydroelectric power (HEP) and the provision of water.</li><li>Farmers – <b>irrigation</b> water for crops.</li></ul><p><b>The losers are:</b></p><p>Local residents – villages and farmland have been flooded by the dam.</p><p>Western India – religious and historic sites have been flooded.</p></div> <div>5. How can bottom up development help India? <input type="checkbox"/></div> <div><p><b>Bottom-up</b> development involves: experts working with communities to identify their needs non-governmental organisations (<b>NGOs</b>), e.g. charities. They are <b>small-scale</b> and <b>inexpensive</b> bring <b>social</b> and <b>economic</b> <b>benefits</b> to local communities.</p><p><b>Biogas plants</b> are an example of bottom-up development in India. Biogas plants are pits that are filled with dung which ferments to produce methane.</p><p><b>The benefits are:</b></p><ul style="list-style-type: none"><li>Cooking with gas is smoke-free, reducing respiratory illnesses.</li><li>Girls have more time to go to school rather than collecting fuelwood.</li><li>Slurry produced is a nutrient rich fertiliser.</li><li>Larger plants can be used to generate electricity.</li></ul></div> | <div>6. India, which way next? <input type="checkbox"/></div> <div><p><b>Geopolitical influence</b> – When a country becomes a major international player in the world market having established good trading relationships.</p><p>India's role is increasing in Asia, and globally:</p><ul style="list-style-type: none"><li>Globally, India belongs to the <b>G20</b> group of the world's largest economies.</li><li>Original founder of the BRICS nations.</li><li>India can help resolve global problems (e.g. climate change).</li><li>At COP28 in 2023, India introduced two initiatives – the 'LiFE' movement and the "green credit" initiative</li><li>India now supports investment through the <b>World Bank</b> in developing countries.</li><li>It is an important member of the <b>United Nations</b> and is one of the largest contributors to UN peace keeping missions.</li><li>Despite rapid economic growth, India has not invested enough in its own <b>infrastructure</b>.</li><li>India's government does not receive enough tax revenue (from TNCs) owing to tax free incentives to develop its infrastructure (transport, piped water and sewage treatment).</li></ul></div> |

| kitesurfen                   | <i>kitesurfing</i>         |  |
| schwimmen                    | <i>swimming</i>            |  |
| Ich bin ...gefahren          | <i>I travelled</i>         |  |
| Ich bin Ski gefahren         | <i>I went skiing</i>       |  |
| Ich habe Snowtubing gemacht. | <i>I went snowtubing</i>   |  |
| Ich habe Eistennis gespielt. | <i>I played ice tennis</i> |  |

**High frequency words**

|           |                   |  |
|-----------|-------------------|--|
| nur       | <i>only</i>       |  |
| dort      | <i>there</i>      |  |
| zu        | <i>too</i>        |  |
| nicht     | <i>not</i>        |  |
| gar nicht | <i>not at all</i> |  |
| sehr      | <i>very</i>       |  |
| ungefähr  | <i>about</i>      |  |
| viel      | <i>a lot/much</i> |  |
| viele     | <i>many</i>       |  |

**Wann war das? When was it?**

|                           |                                  |  |
|---------------------------|----------------------------------|--|
| in den Ferien             | <i>in the holidays</i>           |  |
| im Sommer/<br>Winter      | <i>in the summer/<br/>winter</i> |  |
| letzten Sommer/<br>Winter | <i>last summer/<br/>winter</i>   |  |
| heute                     | <i>today</i>                     |  |
| gestern                   | <i>yesterday</i>                 |  |

**Wie ist/war das Wetter? What is/was the  
weather like?**

|                                  |  |  |
|----------------------------------|--|--|
| Wie ist/war das Wetter?          | <i>How is/was the weather?</i>               |  |
| Es ist/war...                    | <i>It is/was</i>                             |  |
| sonnig/kalt/heiß                 | <i>sunny/cold/hot</i>                        |  |
| wolkig/windig/ neblig            | <i>cloudy/windy/ foggy</i>                   |  |
| Es regnet/schneit                | <i>It is raining/snowing</i>                 |  |
| Es donnert und blitzt.           | <i>There is thunder and<br/>lightening.</i>  |  |
| Es hat geregnet/<br>geschneit    | <i>It rained/snowed.</i>                     |  |
| Es hat gedonnert und<br>geblitzt | <i>There was thunder and<br/>lightening.</i> |  |

| gehen - to go  |                   |  |
|----------------|-------------------|--|
| ich gehe       | I go              |  |
| du gehst       | you go            |  |
| er/sie/es geht | he/she/it goes    |  |
| wir gehen      | we go             |  |
| ihr geht       | you go            |  |
| Sie/sie gehen  | you(form)/they go |  |

| haben - to have |                      |  |
|-----------------|----------------------|--|
| ich habe        | I have               |  |
| du hast         | you have             |  |
| er/sie/es hat   | he/she/it has        |  |
| wir haben       | we have              |  |
| ihr habt        | you all have         |  |
| Sie/sie haben   | you (form)/they have |  |

| sein - to be  |                     |  |
|---------------|---------------------|--|
| ich bin       | I am                |  |
| du bist       | you are             |  |
| er/sie/es ist | he/she/it is        |  |
| wir sind      | we are              |  |
| ihr seid      | you all are         |  |
| Sie/sie sind  | you (form)/they are |  |

| Meinungen - opinions     |                    |  |
|--------------------------|--------------------|--|
| Meiner Meinung nach (V2) | In my opinion      |  |
| Es ist/war .....         | It is/was .....    |  |
| Ich finde/fand           | I find/found       |  |
| Ich denke/dachte         | I think/thought    |  |
| Ich glaube/ glaubte      | I believe/believed |  |
| Es macht Spaß            | It is fun          |  |
| Es hat Spaß gemacht      | It was fun         |  |

| Strong verbs in German change the vowel in the “du & er/sie/es/man” forms only |               |  |
|--|---------------|--|
| fahren = fährst/fährt  | to travel     |  |
| tragen – trägst/trägt  | to wear       |  |
| essen = isst/isst  | to eat        |  |
| sehen = siehst/sieht   | to watch      |  |
| lesen – liest/liest  | to read       |  |
| Verbs with a stem ending in –d or –t add an extra “e” in these forms           |               |  |
| arbeiten = arbeitest/arbeitet  | to work       |  |
| finden – findest/findet  | to think/find |  |

| To talk about actions in the past use the perfect tense.<br>You need a form of haben or sein (for movement verbs)<br>plus a past participle (ge+verb stem+t) |                                |  |
|--|--------------------------------|--|
| Ich habe/er, sie hat/wir haben:  | I/he, she/we                   |  |
| gespielt/gelernt/<br>gemacht/gekauft   | played/learnt/<br>did/bought/  |  |
| some past participles are irregular  |                                |  |
| getragen/ gesehen/gelesen  | wore/saw/read                  |  |
| Ich bin/er, sie ist/wir sind:  | I/he, she/we                   |  |
| some past participles are irregular  |                                |  |
| gefahren/gegangen/ geschwommen/geblieben   | travelled/went/<br>swam/stayed |  |

To talk about how you travel or who you travel with use:

mit + mode of transport/person –

“mit” always takes **DATIVE CASE**

Masc: der changes to **dem**

Fem: die changes to **der**

Neut: das changes to **dem**

mit dem Bus/mit meinem Bruder

mit der Straßenbahn/mit meiner Familie

The imperfect tense is sometimes used to talk about the past. Usually used for formal situations.

Three key verb are often used in the imperfect to

DESCRIBE things in the past

|  |           |  |
|--|-----------|--|
| Es war   | It was    |  |
| Ich war  | I was     |  |
| Es hatte   | It had    |  |
| Ich hatte  | I had     |  |
| Es gab   | There was |  |
| Es war sehr touristisch – it was very touristy                 |           |  |
| Die Stadt hatte einen Marktplatz – the town had a market place |           |  |
| Es gab keinen Bahnhof – there was no station                   |           |  |

# The Role of Colours in Poster Design

Colours speak volumes. A vibrant red can ignite passion, a deep blue can evoke tranquillity, and a refreshing green can bring peace. Psychologists have long studied color theory, examining how different shades impact our minds and emotions.

## Warm colours

Warm colours, such as red, orange, and yellow, are often *associated with energy, joy, and optimism*.

## Cool colours

On the other hand, cool colours like blue, green, and purple often *symbolize peace, calm, and harmony*.

## Cultural impact

However, colour perception isn't purely psychological; it's also cultural. For example, white represents purity in Western cultures, while in some Asian cultures, it symbolizes mourning.

## Aesthetics and readability

Color combinations also significantly impact a poster's aesthetics and readability. **Complementary colours** create a vibrant look with high contrast, **analogous colours** offer a rich, monochromatic look, while triadic colours provide a balanced and harmonious contrast. Designers often adjust these schemes, ensuring the right balance between visual appeal and readability

## Film Color Palettes and Schemes

A film colour palette is a set of colours that a filmmaker uses to create a specific mood or tone. It can consist of two or more colours that work together to create a cohesive look and feel. Filmmakers use color palettes to help tell their story and convey their message. For example, a filmmaker might use a muted color palette to create a sense of nostalgia or a bright and vibrant color palette to create a sense of excitement.

| Keyword       | Principles of Design – read, cover, write, review  | tick |
|---------------|--|------|
| Colour theory | Color theory is the collection of rules and guidelines which designers use to communicate with users through appealing color schemes in visual interfaces.   |      |
| Colour wheel  | A color wheel is a tool that helps you to combine appropriately the colors, and its represented by a circle formed by primary, secondary, and tertiary colors.   |      |
| RGB           | RGB Color model stands for Red, Green, and Blue and is mainly used for electronic displays including computers and smartphones, and is based on the additive color model of light waves.   |      |
| CMYK          | CMYK Color model stands for Cyan, Magenta, Yellow, and Key (Black). CMYK is subtractive and is used for printing.  |      |
| Monochromatic | The monochromatic scheme as the name says combine different shades from one color to create an attractive design.  |      |
| Complimentary | A complimentary colour scheme uses colours opposite each other on the colour wheel to create a high contrast aesthetic.  |      |
| Analogous     | Analagous colours are next to each other on the colour wheel. They are often found in nature, for example in the changing colours of autumn leaves progressing around the colour wheel.<br>An analogous colour scheme is characterised by a lack of contrast, unlike a complementary colour scheme |      |
| Hue           | Hue either refers to is a pure colour or the dominant colour. If black is added to a hue it becomes a shade and if white is added it becomes a tint.   |      |
| Saturation    | Saturation refers to the intensity of a colour. Highly saturated colours appear more vibrant and bold, whereas less saturation appears dull.   |      |

# Bournemouth School: History Department: Knowledge Organiser: Year 9: Autumn 2: Hitler's Rise to Power

## Timeline of key events:

**August 1914:** WWI starts and Hitler joins the German army  
**1918:** Hitler awarded the Iron Cross for bravery in WWI  
**Sept. 1919:** Anton Drexler founds DAP  
**Feb. 1920:** Twenty Five Point Programme written declaring the main policies of the Nazi Party  
**1921:** SA formed by Ernst Rohm  
**1923:** Hyperinflation  
**Nov. 1923:** The Munich Putsch; the failed attempt by Nazi party to overthrow the regional government of Bavaria and national government of Germany by force  
**April 1924:** Hitler sentenced to 5 years in Landsberg Prison (released after only 9 months)  
**1924:** Ban on Nazi Party lifted  
**1926:** Bamberg Conference  
**1928 Election:** Nazis won 12 seats in the Reichstag  
**29 Oct. 1929:** Wall Street Crash; more than 16 million shares were traded in panic selling, triggering further sales and leading to a world economic crisis  
**1928-30:** Muller government  
**1930-May 1932:** Brüning government  
**Sept 1932 Election:** Nazis win 107 seats in the Reichstag  
**1932: Presidential Election:** Hindenburg wins, but Hitler polls 13.4m votes  
**July 1932 Election:** Nazis win 230 seats in the Reichstag  
**November 1932 Elections:** Nazis win 196 seats in the Reichstag  
**30 January 1933:** Hitler appointed Chancellor of Germany by Hindenburg

## Key terms/definitions

| Term                  | Definition   | ✓ |
|-----------------------|--|---|
| Balanced budget       | When a nation does not spend more than it earns  |   |
| Bamberg Conference    | Nazi Party meeting where Hitler strengthened his power and reorganised the Nazi party  |   |
| Centre Party (ZP)     | A Catholic Party occupying the middle ground in political views  |   |
| Charisma              | A quality in leadership which arouses loyalty and enthusiasm for a public figure   |   |
| Civil Servants        | Citizens who work for and are paid by the government   |   |
| Communist             | Supporter of communism: a political idea where workers have power and wealth is shared   |   |
| DAP                   | German Workers Party; the early Nazi Party, established by Anton Drexler in 1919   |   |
| Fuhrer                | Leader; title given to Hitler to define his role of absolute authority   |   |
| Fuhrerprinzip         | The idea that the Nazi Party and Germany should have one leader, obeyed by all   |   |
| Gauleiter             | The leader of branches of the Nazi Party (Gaue; single called Gau)   |   |
| General Elections     | Elections held for the German people to choose deputies to sit in the Reichstag  |   |
| Great Depression      | Slump in the economy in the 1930s which led to high unemployment   |   |
| Heil Hitler           | Raised arm salute to Hitler  |   |
| Hitlerjugend          | Hitler Youth movement, set up for the young in Germany, to convert them to Nazi ideas  |   |
| Indoctrination        | Converting people to a set of ideas using education and propaganda   |   |
| Informant             | Person who gives information to the authorities about the activities of other people   |   |
| Left wing             | People who favour socialism and /or communism  |   |
| Manifesto             | A public declaration of the policy of a political party  |   |
| Mein Kampf            | Book containing autobiography/political views of Hitler written in 1924 in Landsberg Prison  |   |
| NSDAP                 | National Socialist Party or Nazi Party   |   |
| Presidential Election | Elections held for the people of Germany to choose the President of the Weimar Republic  |   |
| Political Intrigue    | Trickery and secret deals used in politics instead of open political debate  |   |
| Propaganda            | Use of a variety of means including newspapers, broadcasts and education to accept political ideas without question  |   |
| Querfront             | 'Cross front': bringing together different strands of left & right-wing parties to rule Germany  |   |
| RFB                   | Red Front Fighters; Communist private army (militia)   |   |
| Right Wing            | People who favour groups that are nationalistic, patriotic and sometimes racist  |   |
| SA                    | Sturmabteilung; paramilitary storm troopers of the Nazi Party  |   |
| SS                    | Schutzstaffel: originally Hitler's bodyguard, they became the most powerful troops in Nazi Germany and were responsible for concentration camps and the Final Solution |   |
| Stock market          | The place where stocks and shares are traded; Wall Street in New York was the most important Stock Market in the world in the 1920s                                    |   |
| Taxes                 | Money paid by workers to the government to fund public works, schools, unemployment benefits etc   |   |
| Treason               | The act of betraying your country; considered to be one of the most serious criminal acts  |   |
| Unemployment          | The number of people who are without a job in a country  |   |
| Unemployment benefit  | Money given to the unemployed by the government (unemployment insurance)   |   |

| 1. Keeping Control by using Terror   |  |   | 2. Keeping Control by using propaganda   |   |   |
|--|--|---|--|---|---|
| Method   | Description  | ✓ | Method   | Description   | ✓ |
| SS   | Led by Himmler, oversaw the terror state including concentration camps   |   | Ministry of Propaganda   | Led by Joseph Goebbels, oversaw all censorship and propaganda   |   |
| Concentration Camps (from Feb 1933)  | Used to imprison the Nazi's enemies: different categories  |   | Censorship   | Anti-Nazi papers closed, Radio controlled, pre-publication censorship, Jazz music banned, book burnings   |   |
| Gestapo 1933   | Secret Police, had power to arrest and send to camps without trial   |   | Propaganda   | Spread Nazi message through: Posters, films, rallies (Nuremburg), architecture, theatre, literature, 1936 Olympics (4x Gold medals for Jesse Owens, pause on anti-Semitism) |   |
| Night of the Long Knives (30 <sup>th</sup> June 1934)  | Also known as 'Operation Hummingbird' or the 'Blood Purge'; this event saw the purging of Hitler's military and political rivals in the SA in order to win the support of the army |   |  |   |   |
| 3. Keeping control of the Law  |  |   | 4. Keeping control of the churches   |   |   |
| Method   | Description  | ✓ | Method   | Description   | ✓ |
| Nazi Socialist League for the Maintenance of Law   | All judges had to join this organisation and swear an oath of loyalty.   |   | Catholic Church  | Concordat signed with Catholic Church 1933. Hitler agreed to allow Catholic schools, if the church stayed out of politics   |   |
| German Lawyer's Front 1933   | All lawyers had to join and swear oath, 100,000 members by end of 1933   |   | Protestant Church  | All Protestant churches merged in 1933 under Bishop Muller, Nazification of the churches – swastikas in church etc.   |   |
| People's Court 1934  | Cases of treason tried and defendants summarily executed.  |   | Faith Movement   | Rival church set up in 1933 to worship traditional volk images – worship of the soil, crops etc   |   |
| 5. What opposition did Hitler face from churches?  |  | ✓ | 6. What opposition did Hitler face from the youth?   |   | ✓ |
| 1. <b>Catholic Church:</b> Catholic schools shut, 400 priests sent to camps, vocal opposition from Cardinal Galen. Pope Pius XI issued an encyclical in 1937: 'With burning anxiety', read out by priests in Catholic churches. This showed resistance to Nazi attempts of control but was met with retaliation<br>2. <b>Protestant Church</b> : "Confessional Church" led by Father Niemoller. Emergency Pastor's League 7000 members |  |   | 1. <b>Edelweiss Pirates:</b> attacked Hitler Youth, listened to swing and jazz music. 2,000 members by 1939. Tended to be working class youths. 'Navajos' in Cologne, 'Kittelbach Pirates' in Dusseldorf and 'Roving Dudes' in Essen. Not considered a serious threat by Nazi authorities.<br><br>2. <b>Swing Youth:</b> they listened to Swing music (hated by the Nazis) and danced. Mainly from the middle classes. Rebelled against the order and discipline of the Nazis. |   |   |
| 7. What opposition did Hitler face from ordinary Germans?  |  | ✓ |  |   |   |
| 1. Genuine support as result of Germany's economic recovery 1933.<br>2. Many were happy to see Germany restored, Versailles reversed, army rebuilt.<br>3. Many were happy that Communists had been imprisoned.<br>4. Army: In 1938, 16 Generals were removed, including Blomberg, Fritsch and von Brauchitsch who were critical of Hitler's foreign policy.<br>5. Three failed assassination attempts by 1939                          |  |   |  |   |   |

## Year 9 – Maths – Autumn 2 – Units 1 &amp; 2

| Keyword                      | Definition  | Example(s)  |
|------------------------------|---|---|
| Combinations                 | The number of ways of combining objects, found by multiplying the number of options for each choice     | <i>Choose 2 students from a class of 30.</i><br>$\frac{30 \times 29}{2} = 435$                                    |
| Estimating                   | Rounding values to 1 or 2sf to simplify a calculation   |   |
| Factor                       | A number that divides exactly into a given number   | <i>8 is a factor of 24</i>  |
| Multiple                     | A number in the given numbers times table   | <i>18 is a multiple of 6</i>  |
| Prime Factor Tree            | Breaks up a number into products of its prime factors   | $\begin{array}{c} 12 \\ \swarrow \quad \searrow \\ 4 \quad 3 \\ \swarrow \quad \searrow \\ 2 \quad 2 \end{array}$ |
| Prime Factor Decomposition   | A number written as a multiplication of its prime factors, normally written in index form.              | $140 = 2^2 \times 5 \times 7$   |
| HCF (highest common factor)  | The largest number that divides into 2 numbers with no remainder  | <i>HCF of 20 and 28</i><br>4  |
| LCM (lowest common multiple) | The smallest number that 2 numbers divide into exactly  | <i>LCM of 20 and 28</i><br>140  |
| Standard form                | A number written in the form $A \times 10^n$ , where $0 < A \leq 10$ and $n$ is an integer              | $0.00284 = 2.84 \times 10^{-3}$   |
| Surd                         | An irrational number, written exactly using square or cube roots  | $\sqrt{5}, \sqrt[3]{8}$   |
| Rational                     | A number that can be expressed in the form $\frac{a}{b}$  | $\frac{6}{7}, 1.5, 0.\dot{6}$   |
| Irrational                   | A non-terminating decimal with no recurring pattern   | $\pi, \sqrt{2}, 3\sqrt{5}$  |
| Rationalising a denominator  | Multiplying $\frac{a}{\sqrt{b}}$ by $\frac{\sqrt{b}}{\sqrt{b}}$ to attain an integer denominator of $b$ |   |

| Keyword              | Definition   | Example(s)  |
|----------------------|--|---|
| Identity             | The $\equiv$ symbol shows an identity. In an identity the two expressions are equal for all values of the variables.   | $2(x + 5) \equiv 2x + 10$   |
| Equation             | An equation is only true for certain values of the variable. An equation has an equals sign, the variable and numbers. It can be solved to find the value of the variable. | $2y - 4 = 9y + 1$   |
| Consecutive integers | Numbers one after the other in order.  | 2, 3, 4, or<br>-8, -7, -6   |
| Expression           | An expression contains letter and/or number terms but no equals sign   | $2ab$<br>$2ab + 3b$<br>$2ab - 7$                                    |
| Term                 | Separate parts of expressions, equations, formulae and identities separated by addition or subtraction   | Within $2ab + 3b - 7$ there are 3 terms                             |
| Coefficient          | The numerical value in an algebraic term   | 3 is the coefficient in $3x^2$                                      |
| Formula              | A formula has an equals sign and letters to represent different quantities.  | $A = \pi r^2$   |
| Subject of a formula | The subject of a formula is the letter on its own, on one side of the equals sign.   | $s$ is the subject of $s = ut + \frac{1}{2}at^2$                    |
| The $n$ th term      | The $n$ th term of a sequence tells you how to work out the term at position $n$ (any position). It is also called the general term of the sequence                        |   |
| $u_n$                | $u_n$ denotes the $n$ th term of a sequence,   | $u_1$ is the first term,<br>$u_2$ is the second term,<br>and so on. |
| Arithmetic sequence  | Terms increase by a fixed number called the common difference. General form $An + B$   | 3, 7, 11, 15, ...<br>nth term = $4n - 1$                            |
| Geometric sequence   | Terms increase by a constant multiplier called the ratio. General form $a \times r^n$ or $a \times r^{n-1}$  | 2, 6, 18, 54, ...<br>nth term = $2 \times 3^{n-1}$                  |
| Quadratic expression | A quadratic expression contains a term in $n^2$ but no higher power of $n$ . General form $an^2 + bn + c$  | 3, 8, 15, 24, ...<br>nth term = $n^2 + 2n$                          |
| Expand               | Remove brackets by multiplying terms   | $2(2x + 1) \equiv 4x + 2$   |
| Factorise            | Arrange an expression into a product of its factors by placing terms in brackets.  | $4x + 2 \equiv 2(2x + 1)$   |

After completing a Prime Factor Decomposition for numbers  $A$  and  $B$ :

$$HCF = A \cap B$$

$$LCM = A \cup B$$

Surd Laws

- $a\sqrt{b} \times c\sqrt{d} = ac\sqrt{bd}$
- $\frac{a\sqrt{b}}{c\sqrt{d}} = \frac{a}{c} \sqrt{\frac{b}{d}}$
- $\sqrt{a^2} = \sqrt{a^2} = a$

Standard form operations

- $(A \times 10^n) \times (B \times 10^m) = (AB) \times 10^{n+m}$
  - $(A \times 10^n) \div (B \times 10^m) = \left(\frac{A}{B}\right) \times 10^{n-m}$
  - $(A \times 10^n) \pm (B \times 10^n) = (A \pm B) \times 10^n$
- note** the powers must be the same

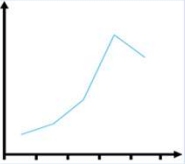

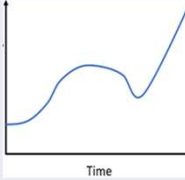

Index Laws

- $x^a \times x^b = x^{a+b}$
- $x^a \div x^b = x^{a-b}$
- $(x^a)^b = x^{ab}$
- $x^0 = 1$
- $x^{\frac{1}{a}} = \sqrt[a]{x}$
- $x^{-a} = \left(\frac{1}{x}\right)^a$

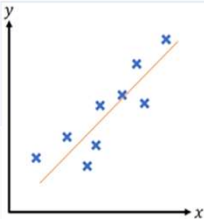

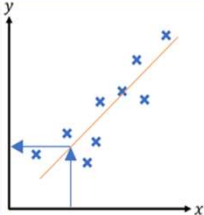

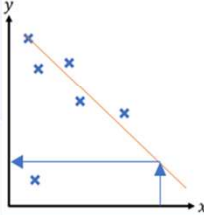

Year 9 – Maths – Autumn 2 – Unit 3

| Keyword               | Definition  | Example(s)   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
|-----------------------|---|--|------|--|--------|---|---|-----|---------|---|---------|---------|---|-------|--|---|-----|--|---|---|
| Qualitative           | Describes a characteristic of the data  | <i>Colour, Brand</i>   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Quantitative          | Data counted or measured in numerical values  | <i>Height, Weight</i>  |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Discrete              | Data that takes fixed values  | <i>Shoe size, Year</i>   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Continuous            | Data that can take any value  | <i>Foot length, Time</i>   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Frequency polygon     | Used for grouped data with even class-widths. Plot midpoint against frequency               |   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Pie chart             | Shows portions of a whole, split into sectors   |  |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Stem-and-leaf diagram | Simplifies writing long lists of numbers by using common digits as a stem. Must have a key. | <table><thead><tr><th>Male</th><th></th><th>Female</th></tr></thead><tbody><tr><td>8</td><td>1</td><td>9 9</td></tr><tr><td>9 5 2 0</td><td>2</td><td>1 2 6 7</td></tr><tr><td>8 7 3 0</td><td>3</td><td>0 4 4</td></tr><tr><td></td><td>4</td><td>5 6</td></tr><tr><td></td><td>5</td><td>4</td></tr></tbody></table> | Male |  | Female | 8 | 1 | 9 9 | 9 5 2 0 | 2 | 1 2 6 7 | 8 7 3 0 | 3 | 0 4 4 |  | 4 | 5 6 |  | 5 | 4 |

|                       | 5   | 4  |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Median                | The middle piece of data when in order of size, found using $\frac{n+1}{2}$ .               | <i>Find the median of the males:</i><br>29   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Range                 | A measure of spread. Difference between largest and smallest.                               | <i>Find the range of the males</i><br>20   |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |
| Time-series           | A graph that shows how data varies over time  |    |      |  |        |   |   |     |         |   |         |         |   |       |  |   |     |  |   |   |

Pie chart

$$\text{Sector angle} = \frac{f}{\Sigma f} \times 360$$

| Keyword          | Definition  | Example(s)  |
|------------------|---|---|
| Scatter graph    | Displays bivariate data. Used to show if there is a relationship.   |  |
| Line of best fit | Drawn on a scatter graph to show the trend and predict data values. |   |
| Correlation      | A description of the relationship of bivariate data.                | <i>Positive, negative, no</i>   |
| Interpolation    | Predicting within the range of data.                                |  |
| Extrapolation    | Predicting outside of the range of data                             |  |
| Anomaly          | A piece of data that does not fit the trend.                        |   |
| Mode             | The most common piece of data.                                      | <i>Find the mode of 2, 6, 3, 6, 4</i><br>= 6  |
| Mean             | The sum of all the pieces of data, divided by how many there are    | <i>Find the mean of 2, 6, 3, 6, 4</i><br>= 4.2                                      |

$$\text{Mean from grouped data} = \frac{\Sigma fx}{\Sigma f}$$

$$\text{Mean from individual data} = \frac{\Sigma x}{f}$$

## The Baroque Period

### Dynamics

Terraced dynamics – music which has blocks of both loud and soft dynamic and no gradual changes

### Rhythm

Allemande – a dance with a moderate tempo and 2 semiquaver upbeat

Courante – a dance in triple time

Gigue – a dance in compound time with characteristic dotted and quaver rhythms

Sarabande – a slow dance in triple time often with emphasis on the second beat via the use of a dotted rhythm.

### Texture

Basso Continuo – a part in the texture played by a melodic bass instrument and a chordal instrument which fills out the harmonies

Canon – strict imitation of a melodic line at a set distance of time

Concertante – group of solo instruments within a concerto grosso

Imitation – when one melodic part copies the music of another whilst the first part continues their melody

Melody dominated homophony – a texture with a melody part and an accompaniment

Monophonic – a texture with a single melodic line and no accompaniment

Polyphonic – a texture in which many melodies (ie 2 or more) are played at the same time.

Ripieno – orchestral/ accompanying group of instruments within a concerto grosso

### Structure and Form

Aria – literally song – songlike music in opera which often tells us how the character is feeling. In the Baroque period an aria was commonly in ternary form, and the singer would ornament the melody on the second A section

Chorus – a piece in an opera which is sung by the choir or chorus of singers

Concerto Grosso – a multmovement piece for a small group of soloists and an orchestra

Dance suite – a collection of dances designed to be performed together. In the Baroque period, this commonly went Allemande, courante, sarabande, gigue

Opera – a play in which much of the action is sung rather than spoken. Accompanied by an orchestra. First developed in Italy in the Baroque Period

Recitative – a section in an opera which includes speech like rhythms and is sung in a declamatory style. Often has a sparse accompaniment. Moves the action on

Ritornello Form – literally a little return. Often used for the first movement of a concerto grosso. There is a returning theme played by the ripieno group which is separated by solo episodes played by the concertino group.

### Melody

Mordent – ornament in which the main note is played, followed quickly by the one above and then the main note again.

Ornamented – refers to the fact a Baroque melodies were often embellished by the performer with ornaments such as trills and mordents

Trill – rapid alternation of the written note and the one above

## The Baroque Period

### Instrumentation/ Sonority

Harpsichord – a keyboard instrument commonly found in the Baroque period where the strings are plucked not struck. Has little ability to sustain notes, and has no capability to vary the dynamics. Often used to play the basso continuo

Lute – a family of plucked string instruments which resemble a guitar, but have a body which has a rounded back (shaped like half a pear). Can be used as a continuo instrument, especially in vocal music

Viol – a family of string instruments which preceded the violin family and were still in use in the early Baroque period. Unlike the violin family, they have frets on the finger board.

### Tonality

Major key – music composed primarily using the notes of a major scale

Minor key – music composed primarily using the notes of the minor scale

### Harmony

First inversion chord – a chord which has the 3<sup>rd</sup> (middle note) of the triad in the bass

Root position chord – a chord which has the 1<sup>st</sup> or root note of the triad in the bass

Second inversion chord – a chord which has the 5<sup>th</sup> (top note) of the triad in the bass

Seventh Chord – a triad which has the seventh note above the root added to it eg G-B-D-F. The seventh is dissonant with the root, and creates a need to resolve

Suspension – prepared dissonance - a chord which has one note from the previous chord held into the new chord creating a dissonance which is then resolved downwards by step

This QR code will take you to a Spotify playlist with audio examples for the Baroque period unit. You will find it helpful to listen to these as you learn.

| Keyword               | Learn  | ✓ |
|-----------------------|--|---|
| Post-16 opportunities | Education or training beyond Year 11.  |   |
| County Lines          | Where illegal drugs are transported from one area to another, often across police and local authority boundaries, usually by children or vulnerable people who are coerced into it by gangs. |   |
| Disenchantment        | A feeling of no longer believing in the values of society  |   |
| Trap House            | A base used for drug operations, usually a person's home who has been bribed or threatened into the situation.   |   |
| Identity              | Refers to our sense of who we are as individuals and as members of social groups.  |   |
| Healthy lifestyles    | Have a combination of a balanced diet, good sleep habits, daily exercise and hobbies for relaxation.   |   |
| Free Sugar            | Any sugar added to a food or drink. Or the sugar that is already in honey, syrup and fruit juice. These are free because they're not inside the cells of the food we eat.                    |   |
| Endorphines           | Are a type of "feel-good" brain chemical. They act as natural pain and stress relievers.   |   |

**County Lines – the risks**

A criminal record, prison, addiction, isolation from society and family.

Any rewards are ultimately outweighed by the risks. Remember these gangs prey on vulnerable people and have only their interests at heart.

**Tips for a healthy lifestyle:**

**Relaxing –**  
Try hobbies out, then do what you enjoy.  
Hobbies that calm are good.  
Hobbies that offer challenge and development are good.

**Sleep –**  
Get at least 7-9 hrs  
No devices or social media before bed.  
Establish a relaxed routine  
Sleep in a cool dark room

**Exercise –**  
Daily exercise is good.  
Participate in team sports.  
Skill development, challenge and shortterm rewards are best.

**Diet –**  
Eat 5 portions of fruit and veg a day.  
Base meals on starchy carbohydrates (potatoes, bread, rice, pasta – even better if wholegrain).  
Have some 'dairy' choosing lower fat & sugar options.  
Eat some beans, pulses, fish, eggs, meat and other proteins ( 2 portions of fish per week, one should be oily).  
Choose unsaturated oils and spreads.  
Drink 6-8 cups/glasses of fluid a day.  
Avoid free sugars.

**Post-16 and the law:** You may leave school at the end of June 2026 when you are 16 years old BUT you must remain in education or training until you are 18.

The diagram shows a central box for 'Yr12/13 - 6th Form' with 'A' Levels' below it. A large blue double-headed arrow connects this box to two other boxes. The left box is 'Training / work' with 'Apprenticeships' and 'Traineeships' below it, accompanied by an icon of a person in a hard hat. The right box is 'FE College' with 'A' Levels, NVQ, BTec' below it, accompanied by an icon of a classroom.

### 3.1.1.1 The structure and function of the Musculo-skeletal System (KO 2 of 3)

#### How do MUSCLES WORK?

Muscles can only PULL they cannot push. This means that they must work in pairs to allow parts of the body to move back and forth. THESE PAIRS ARE CALLED **ANTAGONISTIC PAIRS**.

#### Antagonistic Pairs

- A muscle must work in partnership with another muscle to allow movement to occur.
- The muscle that causes the movement (the pulling muscle) is called the **AGONIST** or **PRIME MOVER**. When this muscle contracts it becomes shorter.
- During this time the other muscle within this partnership is relaxing. This muscle is called the **ANTAGONIST** and is lengthening while it relaxes.

#### EXAMPLES:

When we flex our elbow, the biceps are the **agonist** and the triceps are the **antagonist**. However, these roles are reversed when the elbow extends, with the triceps becoming the **agonist** and the biceps becoming the **antagonist**.

When dorsiflexion occurs in our ankle the tibialis anterior is the **agonist** and the gastrocnemius is the **antagonist**. However, these roles are reversed when plantar flexion occurs at the ankle, with the gastrocnemius becoming the **agonist** and the tibialis anterior becoming the **antagonist**.

#### Muscles of the human body

#### Antagonistic Pairs

|               |                   |
|---------------|-------------------|
| HAMSTRINGS    | QUADRICEPS        |
| GASTROCNEMIUS | TIBIALIS ANTERIOR |
| BICEPS        | TRICEPS           |
| HIP FLEXORS   | GLUTEALS          |
| DELTOID       | LATISSIMUS DORSI  |

#### Types of Muscle Contraction

##### Isotonic Contractions

These contractions occur when there is movement of the body. The ends of the muscles move closer together to cause the movement.

**Isotonic Concentric Contraction** occurs when the muscle shortens e.g. biceps contracting concentrically during the upwards phase of a bicep curl / triceps contracting concentrically during the upwards phase of a press-up

| Muscle Name         | Movement when the agonist                 |
|---------------------|---|
| Sternocleidomastoid | Lifts rib cage up and out when exercising |
| Pectorals           | Lifts rib cage up and out when exercising |
| Intercostals        | Lifts rib cage up and out                 |
| Triceps             | Elbow extension                           |
| Biceps              | Elbow flexion                             |
| Abdominals          | Assists with exhaling                     |
| Quadriceps          | Knee flexion                              |
| Hamstrings          | Knee extension                            |
| Hip flexors         | Hip flexion                               |
| Gluteal muscles     | Hip Extension                             |
| Rotator cuffs       | Shoulder rotation/Circumduction           |

### 3.1.1.1 The structure and function of the Musculo-skeletal System (KO 3 of 3)

#### Isometric Contractions

Takes place when the body is being held in the same position. The length of the muscle stays the same.

**Isotonic Eccentric Contraction** occurs when the muscle lengthening (antagonist) is under tension. An eccentric contraction provides the control of a movement on the downward phase and it works to resist the force of gravity e.g. biceps contracting eccentrically when lowering the weight in a bicep curl.

|                   |                    |
|-------------------|--------------------|
| Tibialis Anterior | Dorsiflexion       |
| Gastrocnemius     | Plantar Flexion    |
| Latissimus Dorsi  | Shoulder adduction |
| Deltoid           | Shoulder Abduction |

#### Types of movement at a joint

#### Sporting Examples

##### Flexion and extension at the shoulder

- The **Deltoid** causes flexion at the shoulder (upwards)
- The **Latissimus dorsi** causes extension at the shoulder (downwards)

##### Flexion and extension at the shoulder

- **Badminton – smash** is flexion at the shoulder, **forehand high serve** is extension at the shoulder

##### Flexion and extension at the elbow

- The **Biceps** cause flexion at the elbow (upwards)
- The **Triceps** cause extension at the elbow (downwards)

##### Flexion and extension at the elbow

- **Push up – upwards** is extension, **downwards** is flexion
- **Football throw-in – releasing the ball** is elbow extension

##### Flexion and extension at the knee

- The **Hamstrings** cause flexion at the knee (heel to buttock)
- The **Quadriceps** cause extension at the knee (leg down)

##### Flexion and extension at the knee

- **Running – heel lift in recovery leg** is flexion, **extension in drive leg when contacting the ground**

##### Flexion and extension at the hip

- The **Hip Flexors** cause flexion at the hip (leg up)
- The **Gluteal muscles** cause extension at the hip (leg down)

##### Flexion and extension at the hip

- **Squats – upward phase** is extension, **downwards phase** is flexion
- **Running – drive leg moving backwards** is hip extension, **recovery leg coming forward** is hip flexion

##### Plantar Flexion and Dorsiflexion at the ankle

- The **Tibialis Anterior** causes dorsiflexion at the ankle (toes up)
- The **Gastrocnemius** cause plantar flexion at the ankle (toes down)

##### Plantar Flexion and Dorsiflexion at the ankle

- **Take off in long jump – plantar flexion**
- **Vertical jump – prep** is Dorsiflexion, **execution** is plantarflexion
- **Drive leg pushing off the ground** is plantar flexion

| Vocabulary taught in Topic 1 - Energy |   |   |
|---------------------------------------|---|---|
| Vocabulary                            | Learn   | ✓ |
| Data                                  | Information, either qualitative or quantitative, that has been collected  |   |
| Fair Test                             | A fair test is one in which only the independent variable has been allowed to affect the dependent variable   |   |
| Interval                              | The quantity between readings   |   |
| Reproducible                          | If the investigation is repeated by another person, or by using different equipment or techniques, and the same results are obtained                                |   |
| Resolution                            | This is the smallest change in the quantity that can be measured by the measuring instrument  |   |
| Variables                             | These are physical, chemical or biological quantities or characteristics  |   |
| Categoric variables                   | These have values that are labels, e.g. names of plants or types of material  |   |
| Continuous variables                  | These can have values that can be given a magnitude either by counting or by measurement  |   |
| Control variable                      | This is one which may, in addition to the independent variable, affect the outcome of the investigation and therefore has to be kept constant or at least monitored |   |
| Dependent variable                    | The variable of which the value is measured for each and every change in the independent variable   |   |
| Independent variable                  | The variable for which values are changed or selected by the investigator   |   |

| Vocabulary taught in Topic 5a – Forces |   |   |

| Accuracy                               | A measurement result is considered accurate if it is judged to be close to the true value   |   |
| Measurement error                      | The difference between a measured value and the true value  |   |
| True value                             | This is the value that would be obtained in an ideal measurement  |   |
| Calibration                            | Marking a scale on a measuring instrument.  |   |
| Systematic error                       | These cause readings to differ from the true value by a consistent amount each time a measurement is made.  |   |
| Zero error                             | Any indication that a measuring system gives a false reading when the true value of a measured quantity is zero, eg the needle on an ammeter failing to return to zero when no current flows. |   |
| Hypothesis                             | A proposal intended to explain certain facts or observations  |   |
| Prediction                             | A prediction is a statement suggesting what will happen in the future, based on observation, experience or a hypothesis   |   |

| Vocabulary taught in Topic 3 – Particle Model of Matter |  |  |
|---|--|--|
| Vocabulary  | Learn  |  |
| Anomalies   | These are values in a set of results which are judged not to be part of the variation caused by random uncertainty   |  |
| Random Error  | These cause readings to be spread about the true value, due to results varying in an unpredictable way from one measurement to the next. Random errors are present when any measurement is made and cannot be corrected. The effect of random errors can be reduced by making more measurements and calculating a new mean |  |
| Range   | The maximum and minimum values of the independent or dependent variables; important in ensuring that any pattern is detected.  |  |
| Precision   | Precise measurements are ones in which there is very little spread about the mean value. Precision depends only on the extent of random errors – it gives no indication of how close results are to the true value   |  |
| Repeatable  | A measurement is repeatable if the original experimenter repeats the investigation using same method and equipment and obtains the same results.   |  |
| Sketch graph  | A line graph, not necessarily on a grid, that shows the general shape of the relationship between two variables. It will not have any points plotted and although the axes should be labelled they may not be scaled   |  |

| Vocabulary taught in Topic 8 - Space |   |   |
|--------------------------------------|---|---|
| Vocabulary                           | Learn   | ✓ |
| Evidence                             | Data which has been shown to be valid   |   |
| Validity                             | Suitability of the investigative procedure to answer the question being asked                                       |   |
| Valid conclusion                     | A conclusion supported by valid data, obtained from an appropriate experimental design and based on sound reasoning |   |

| Prefix | Abbreviation | Power of ten |
|--------|--------------|--------------|
| Giga–  | G            | $10^9$       |
| Mega–  | M            | $10^6$       |
| Kilo–  | k            | $10^3$       |

## Topic 1 – Energy

| Keyword                             | Learn   | ✓ | Quantity                     | Unit                                   | Symbol   |
|-------------------------------------|---|---|------------------------------|--|----------|
| Energy store                        | Name the different stores: kinetic, chemical, thermal (internal), gravitational potential, magnetic, electrostatic, elastic potential and nuclear |   | Energy                       | joule                                  | J        |
| Energy transfer                     | Can be done by waves (light and sound), electrical and work.  |   | Work                         | joule                                  | J        |
| System                              | An object or a group of objects that interact   |   | Power                        | watt                                   | W        |
| Principle of conservation of energy | Energy can be transferred from one store to another, but energy cannot be created or destroyed  |   | Mass                         | kilogram                               | kg       |
| Kinetic energy                      | The amount of energy stored in a moving object  |   | Extension                    | metre                                  | m        |
| Gravitational potential energy      | The amount of energy stored in an object raised above the ground  |   | Height                       | metre                                  | m        |
| Elastic potential energy            | The amount of energy stored in a stretched spring   |   | Force                        | newton                                 | N        |
| Spring constant                     | The force needed to stretch a spring 1 metre  |   | Temperature                  | degrees Celsius                        | °C       |
| Work                                | 1 joule of work is done when a force of 1 N causes an object to move 1 m  |   | Speed                        | metres per second                      | m / s    |
| Power                               | The rate at which energy is transferred (or rate at which work is done)   |   | Spring constant              | newtons per metre                      | N / m    |
| Specific heat capacity              | The amount of energy required to raise the temperature of 1 kg of a substance by 1°C  |   | Gravitational field strength | newtons per kilogram                   | N / kg   |
| Dissipate                           | To scatter in all directions or to use wastefully   |   | Specific heat capacity       | joules per kilogram per degree Celsius | J / kg°C |
| Thermal conductivity                | The higher the thermal conductivity of the material the more the material allows heat to conduct through,   |   |                              |  |          |
| Efficiency                          | The proportion of energy that is usefully transferred   |   |                              |  |          |
| Non-renewable energy resources      | Coal, Oil, Gas and Nuclear. These will run out, because there are finite reserves, which cannot be replenished.                                   |   |                              |  |          |
| Renewable energy resources          | Solar, Wind, Hydroelectric, Wave, Tidal, Geothermal, Biomass/fuel. These will never run out. They are replenished as they are used.               |   |                              |  |          |

**Equations**Kinetic energy =  $\frac{1}{2} \times \text{mass} \times \text{speed}^2$ 

$$E_k = \frac{1}{2} \times m \times v^2$$

Elastic potential energy =  $\frac{1}{2} \times \text{spring constant} \times \text{extension}^2$ 

$$E_e = \frac{1}{2} \times k \times e^2$$

Gravitational potential energy = mass x gravitational field strength x height  $E_p = m \times g \times h$ 

Work = force x distance moved in the direction of the force

$$W = F \times s$$

$$\text{Power} = \frac{\text{Energy transferred}}{\text{Time}}$$

$$P = \frac{E}{t}$$

OR

$$\text{Power} = \frac{\text{Work done}}{\text{Time}}$$

$$P = \frac{W}{t}$$

$$\text{Efficiency} = \frac{\text{Useful output}}{\text{Total input}}$$

**Synagogue:** Jewish place of worship.

**Minyan:** a group of 10 adults required for a Jewish religious service.

**Menorah:** a candle stick holding 7 or 9 candles

**Star of David:** symbol of Judaism, the shape of King David's shield.

**Aron Hakodesh/Ark:** The holiest part of the synagogue which contains the Torah scrolls.

**Ner Tamid:** eternal light/ a light that is kept

burning above the ark

**Bimah:** A raised platform from where the Torah is read.

| Orthodox  | Reform  |
|---|---|
| The person leading the service will face the Ark.   | Worship is more likely to take place on Shabbat and festivals, not every day and The person leading the service will face the congregation/ |
| The service will be held in Hebrew.   | Reform synagogues will use Hebrew and the language of the country they are in   |
| Men and women sit separately to worship   | Men and women sit together to worship The person leading the service will face the congregation.  |
| Orthodox rabbis are male  | Women can be Rabbis.  |
| Covering your head for worship is a sign of respect to G-d. Men are likely to cover their head using a skull cap called a kippah. | Most men will wear head coverings, some women may also chose to wear a kippah or a hat  |
| Women will cover their heads if they are married, often with a hat or scarf.  |   |

**Amidah:** central prayer of Jewish worship- the "standing prayer".

**Shabbat:** the Jewish holy day of the week; starting shortly before sunset on a Friday until night time of Saturday.

| Shabbat at the synagogue   | Shabbat at home   |
|--|---|
| -The congregation stands when the Ark is opened: a reminder of how the Jews stood at the bottom of Mount Sinai when Moses returned with the 10 Commandments.   | -Everything is prepared before Shabbat begins. Many types of work are not allowed on Shabbat, so it needs to be done prior to sunset. |
| -Torah passes through the synagogue, many Jews touch it with their Siddur or the tzitzit on their tallit and then touch their lips. In Ezekiel Jews are told G-d's words should be on their lips and sweet like honey. | -Two candles are placed on the table. They represent the commandments to "remember" and "observe" Shabbat.                            |
|  | -Two loaves of challah bread. These represent the food provided for Jews whilst they wander in the wilderness.                        |
|  | -Wine or grape juice. Drinking Shabbat wine symbolises joy and celebration  |

**Worshipping at home**

**Mezuzah:** A mezuzah is a little box which contains scripture and is nailed to the doorframe of a Jewish house. A Jew will touch the mezuzah as a reminder to follow G-d's commandments.

**Prayer:** Jews are required to pray 3 times a day, for many Jews it would not be possible to go to the synagogue every time. Many women only attend synagogue on Shabbat, so it is important they are able to also worship at home. And G-s omnipresent- everywhere!

**Study of scripture: Tenakh-** The Written Law- Jewish sacred scriptures. A collection of 24 books. **INCLUDES THE TORAH.** **Talmud-** The Oral law- a commentary on the Torah by early Rabbis on how to interpret laws for everyday life.

**How is a baby welcomed into Judaism?**

**Brit Milah:** ceremony of male circumcision; removal of the foreskin for religious reasons. The formal naming of the baby boy will take place here.

**Mohel:** a trained circumciser.

**Sandek:** "Companion of the child".

**Brit Bat:** daughter's covenant. They might light candles or was the baby's feet, name the baby. They might also name the baby at a Shabbat Tora service at the synagogue.

**Redemption of the first born son:** Some Orthodox Jews give a small amount of money 31 days he is born to redeem him.

**How do Jews celebrate coming of Age?**

- Bar Mitzvah:** Ritual for boys at age 13. Son of the Commandment.
- Bat Mitzvah:** Ritual for girls at age 12. Daughter of the Commandment.

| Bar Mitzvah   | Bat Mitzvah   |
|---|---|
| -It will take place of the first Shabbat after his 13 <sup>th</sup> , he will read the Torah in the normal synagogue service. | -In Reform Judaism a Bat Mitzvah is very similar to Bar Mitzvah. A girl will read from the Torah or may recite the Eishet Chayil in Hebrew. The will also attend synagogue in order to prepare. |
| -His Father gives thanks to G-d for bringing his son to maturity and declares he is responsible for his own actions           | -In Orthodox Judaism women don't take a lead role in synagogue services, so instead they may have a family meal with small religious gifts.   |
| -He will have lessons at the synagogue to prepare, especially in helping him understand Hebrew.                               |   |
| -He will wear a tallit for the first time.  |   |
| -Sweets are thrown to represent blessings.  |   |
| -There is a celebratory meal in honour of the Bar Mitzvah boy.  |   |

**How do Jews celebrate a marriage and why?**

- Betrothal/ Kiddushin:** the period of time before the wedding/ engagement.
- Ketubah:** Jewish marriage contract. It is a contract of the husband's duties to the wife.
- Chuppah:** Jewish wedding canopy. Symbolises the home the couple will make together.
- The bride circles the groom 7 times:** Symbolises the bride and groom make space for each other every day.
- The groom breaks a glass under his heel:** Shows regret for the destruction of the temple.
- Mazel Tov:** Hebrew phrase meaning "Good Luck"/ "Congratulations".
- Wedding reception - lots of music and dancing:** Twedding dance is called the Hora.

**How do Jews mourn the dead?**

When a death is announced Jews will make a small tear in their clothes to follow the example of Jacob and as a sign of the grief and sorrow.

"Jacob tore his clothes...and observed mourning for his son" Genesis 37:34)

Burial takes place as ASAP. A simple coffin is used to show equality in death.

Shiva is an intense period of mourning that lasts for 7 days, after the burial.

The same prayer is recited throughout the 12 month mourning period- The Kaddish. It praises G-d and asks for peace.

Mourners leave pebbles at the grave to represent the permanence of memory.

**The dietary laws of Judaism.**

**Dietary laws/ Kashrut:** rules that deal with foods permitted to be eaten, food preparation & food combinations. Most strictly followed by Orthodox Jews.

**Kosher:** permitted food, food that meets the requirements of Jewish law.

This will include certain meat, which has been slaughtered in a specific way. Eg. Beef and chicken.

**Trefah:** foods which are forbidden, means "torn".

Certain meats are forbidden eg. Pork, shrimp and shellfish

Meat and milk CANNOT be mixed. Some Jews will have two lots of utensils etc.

"You shall not boil a kid in its mother's milk"

**How do Jews celebrate Rosh Hashanah and Yom Kippur?**

| Rosh Hashanah: the Jewish New Year   | Yom Kippur: the Day of Atonement.   |
|--|---|
| Special prayers of forgiveness are said in the month leading up to Rosh Hashanah, as well as acts of charity. To atone/ make up for any wrong doing in order to be judged well by G-d. | 10 Day after Rosh Hashanah. No work is to be done. It is the Sabbath of Sabbaths. |
| The shofar is blown daily in the synagogue in the month before Rosh Hashanah and 100 times on Rosh Hashanah. Wakes Jews up (spiritually) and calls them to repent.                     | Jews fast for 25 hours. On this days Jews are expected to practice "self denial". |
| Sweet food such as apples and honey are eaten. Desire for a sweet new year.  | Jews wear white. A sign of purity.  |

**How do Jews celebrate Pesach/ Passover?** The Jewish festival which remembers the Jewish Exodus (escape) from slavery in Egypt. Seder plate below.

Shank bone- sacrifice of lamb for blood on door posts. Bitter herbs- bitterness and hardness of slaves. Charoset- paste that symbolizes the paste used to create the monuments in slavery. Egg- Offering used in the Temple. Parsley- back breaking work of slaves.

| Expressions of frequency     |                             |  |

### The present tense

Use the present tense to talk about what you usually do. See the endings for regular verbs below.

| -ar verb endings present                        |       |  |
|---|-------|--|
| Take off the –ar and add the following endings: |       |  |
| -o  | -amos |  |
| -as   | -áis  |  |
| -a  | -an   |  |

| -er verb endings present                        |       |  |
|---|-------|--|
| Take off the –er and add the following endings: |       |  |
| -o  | -emos |  |
| -es   | -éis  |  |
| -e  | -en   |  |

| -ir verb endings present                        |       |  |
|---|-------|--|
| Take off the –ir and add the following endings: |       |  |
| -o  | -imos |  |
| -es   | -ís   |  |
| -e  | -en   |  |

| Present tense ir (to go) |                    |  |
|--------------------------|--------------------|--|
| voy                      | I am going         |  |
| vas                      | You are (s) going  |  |
| va                       | He/she is going    |  |
| vamos                    | We are going       |  |
| vais                     | You are (pl) going |  |
| van                      | They are going     |  |

| -ar verb endings preterite |        |  |
|----------------------------|--------|--|
| é                          | amos   |  |
| aste                       | asteis |  |
| ó                          | aron   |  |

| -er / ir verb endings preterite |        |  |
|---------------------------------|--------|--|
| í                               | imos   |  |
| iste                            | isteis |  |
| ió                              | ieron  |  |

| Common irregular verbs (preterite) |          |  |
|------------------------------------|----------|--|
| jugué                              | I played |  |
| fui                                | I went   |  |
| fue                                | it was   |  |

| Common irregular verbs (present) |        |  |
|----------------------------------|--------|--|
| hago                             | I do   |  |
| tengo                            | I have |  |
| soy                              | I am   |  |
| estoy                            | I am   |  |
| juego                            | I play |  |

### The near future:

It is the equivalent of 'I am going to do' in English.

Form of 'ir' + a + infinitive  
e.g. Voy + a + jugar

| Common verbs |                     |  |
|--------------|---------------------|--|
| voy a jugar  | I am going to play  |  |
| voy a comer  | I am going to eat   |  |
| voy a ver    | I am going to watch |  |
| va a ser     | It is going to be   |  |

| Tick | Hardwood | Uses  | Advantages  | Disadvantages   |

## GCSE Design Technology: CORE 1.13 Materials Properties

*What is a mechanical property?*

Elements of a material that resist deformation from external forces in a particular way.

| Tick | Property     | Definition  |
|------|--------------|---|
|      | Strength     | Withstands forces by squashing (compressive strength) or stretching (tensile strength). |
|      | Elasticity   | Can return to its original shape once the deforming force has been removed.             |
|      | Plasticity   | (plastics only) Ability to permanently deform without breaking when heated.             |
|      | Malleability | (metals only) Ability to deform in all directions without fracture.                     |
|      | Ductility    | To be drawn out, bent or twisted without fracture.                                      |
|      | Hardness     | Resists deformation, indentation or penetration.  |
|      | Toughness    | Withstands sudden shock or stress.  |
|      | Brittleness  | Inability to withstand sudden shock or stress.  |
|      | Durability   | Withstands deterioration over a long period of time.                                    |
|      | Stability    | Resists changes in shape over time.   |
|      | Stiffness    | Resists bending.  |

## GCSE Design Technology: CORE 1.14 Influences in designing and making

| Tick | Criteria                         | Definition/ description   |
|------|----------------------------------|---|
|      | Fairtrade Foundation             | Tackles poverty and injustice across the world. It ensures farmers are paid a fair price and has better working conditions and tries to prevent child labour.                                     |
|      | Carbon Offsetting scheme         | When companies or individuals reduce their carbon footprint through ways such as planting trees, encouraging staff to cycle to work, car sharing etc.   |
|      | Product disassembly              | When a product can be taken apart so that individual parts can be recycled or reused.   |
|      | Disposal of waste                | This is governed by laws at international, European, national and local levels to ensure that collection, transportation and disposal of waste has the least amount of impact on the environment. |
|      | Human capabilities               | When a design meets the needs of the user and operates within their capabilities.   |
|      | Cost of materials                | Refers to all aspects i.e. the initial cost of the raw material, the costs of maintenance, transportation, recycling and disposal.  |
|      | Manufacturing capability         | Considers the machinery/equipment available to manufacture and then the costings available to actually make the product.  |
|      | Modular                          | A design featuring parts of standard sizes so that they can be constructed in different ways.   |
|      | Consideration of 'green designs' | Global warming and rising energy costs have led to designers thinking about environmental factors when designing products without compromising function, quality or performance.                  |
